

RAD Studio 11.1 Alexandria

Today's Presenters

David Millington

Marco Cantu

Jim McKeeth

Kyle Wheeler

Introducing

RAD Studio 11.1 Alexandria

The Landscape

- **Microsoft released Windows 11**
 - Fully focused on it, key reason for picking “11”
 - New dev platform Windows App SDK
(aka *Project Reunion*)
- **Transition to ARM on desktop**
 - Led by Apple with macOS
 - Plus, ARM reigns on mobile platforms
- **Developers on 4K**
 - High resolution and multi screen are common for developers
 - Growing also for end-users

What's Great in RAD Studio

Developer Productivity - Shipping is a feature. Get to market 5x faster with Delphi and C++Builder

Fast Native Apps - With native compilers, RAD Studio gives your apps the speed they need (no bloat)

Database Access - Key to Delphi's initial design, database access is integral to RAD Studio

Powerful C++ Libraries - Hundreds of C++ libraries can be used in C++Builder or Delphi in RAD Studio

Platform API Access - Gives you access to all the platform APIs on all platforms

Visual Designers - Forget prototyping in another tool, just design it and finish it in the RAD Studio IDE

Strong Community - Full of Technology Partners,
MVPs, trainers, authors and developers

Backward Compatibility – You have an investment
in your code, RAD Studio keeps that relevant

RAD Studio 11.0 Summary

I. Large Focus on IDE

- IDE High DPI and High DPI enabled form designer
- VCL styles in VCL designer; improvements to FMX designer and Multi-window design/code for a unit
- LSP quality and new C++ code formatter
- New Welcome page
- Visual Studio Code LSP support
- Minimal installer improvements

II. Delphi and C++ compilers and toolchains

- C++ Quality: RTTI (components); exception handling
- Delphi macOS 64 ARM (M1) compiler and toolchain
- Minor Delphi language improvements

III. Libraries Improvements

- Delphi RTL quality: TZipFile, 64-bit data structures, Bluetooth LE
- VCL Modernization work
- Better FMX High DPI on Windows and desktop integration, including WebView 2
- Android API 30 support and related work

IV. Additional Delphi Platforms

- Support for WSL 2 (Windows Subsystem for Linux)
- Including WSLg (Linux GUI) on Windows 11

RAD Studio 11.1 Overview

I. Focus on Quality and Improvements

- Usability, performance, stability
- Some new small IDE features

II. Better Code Insight and LSP

- For both languages, Delphi and C++

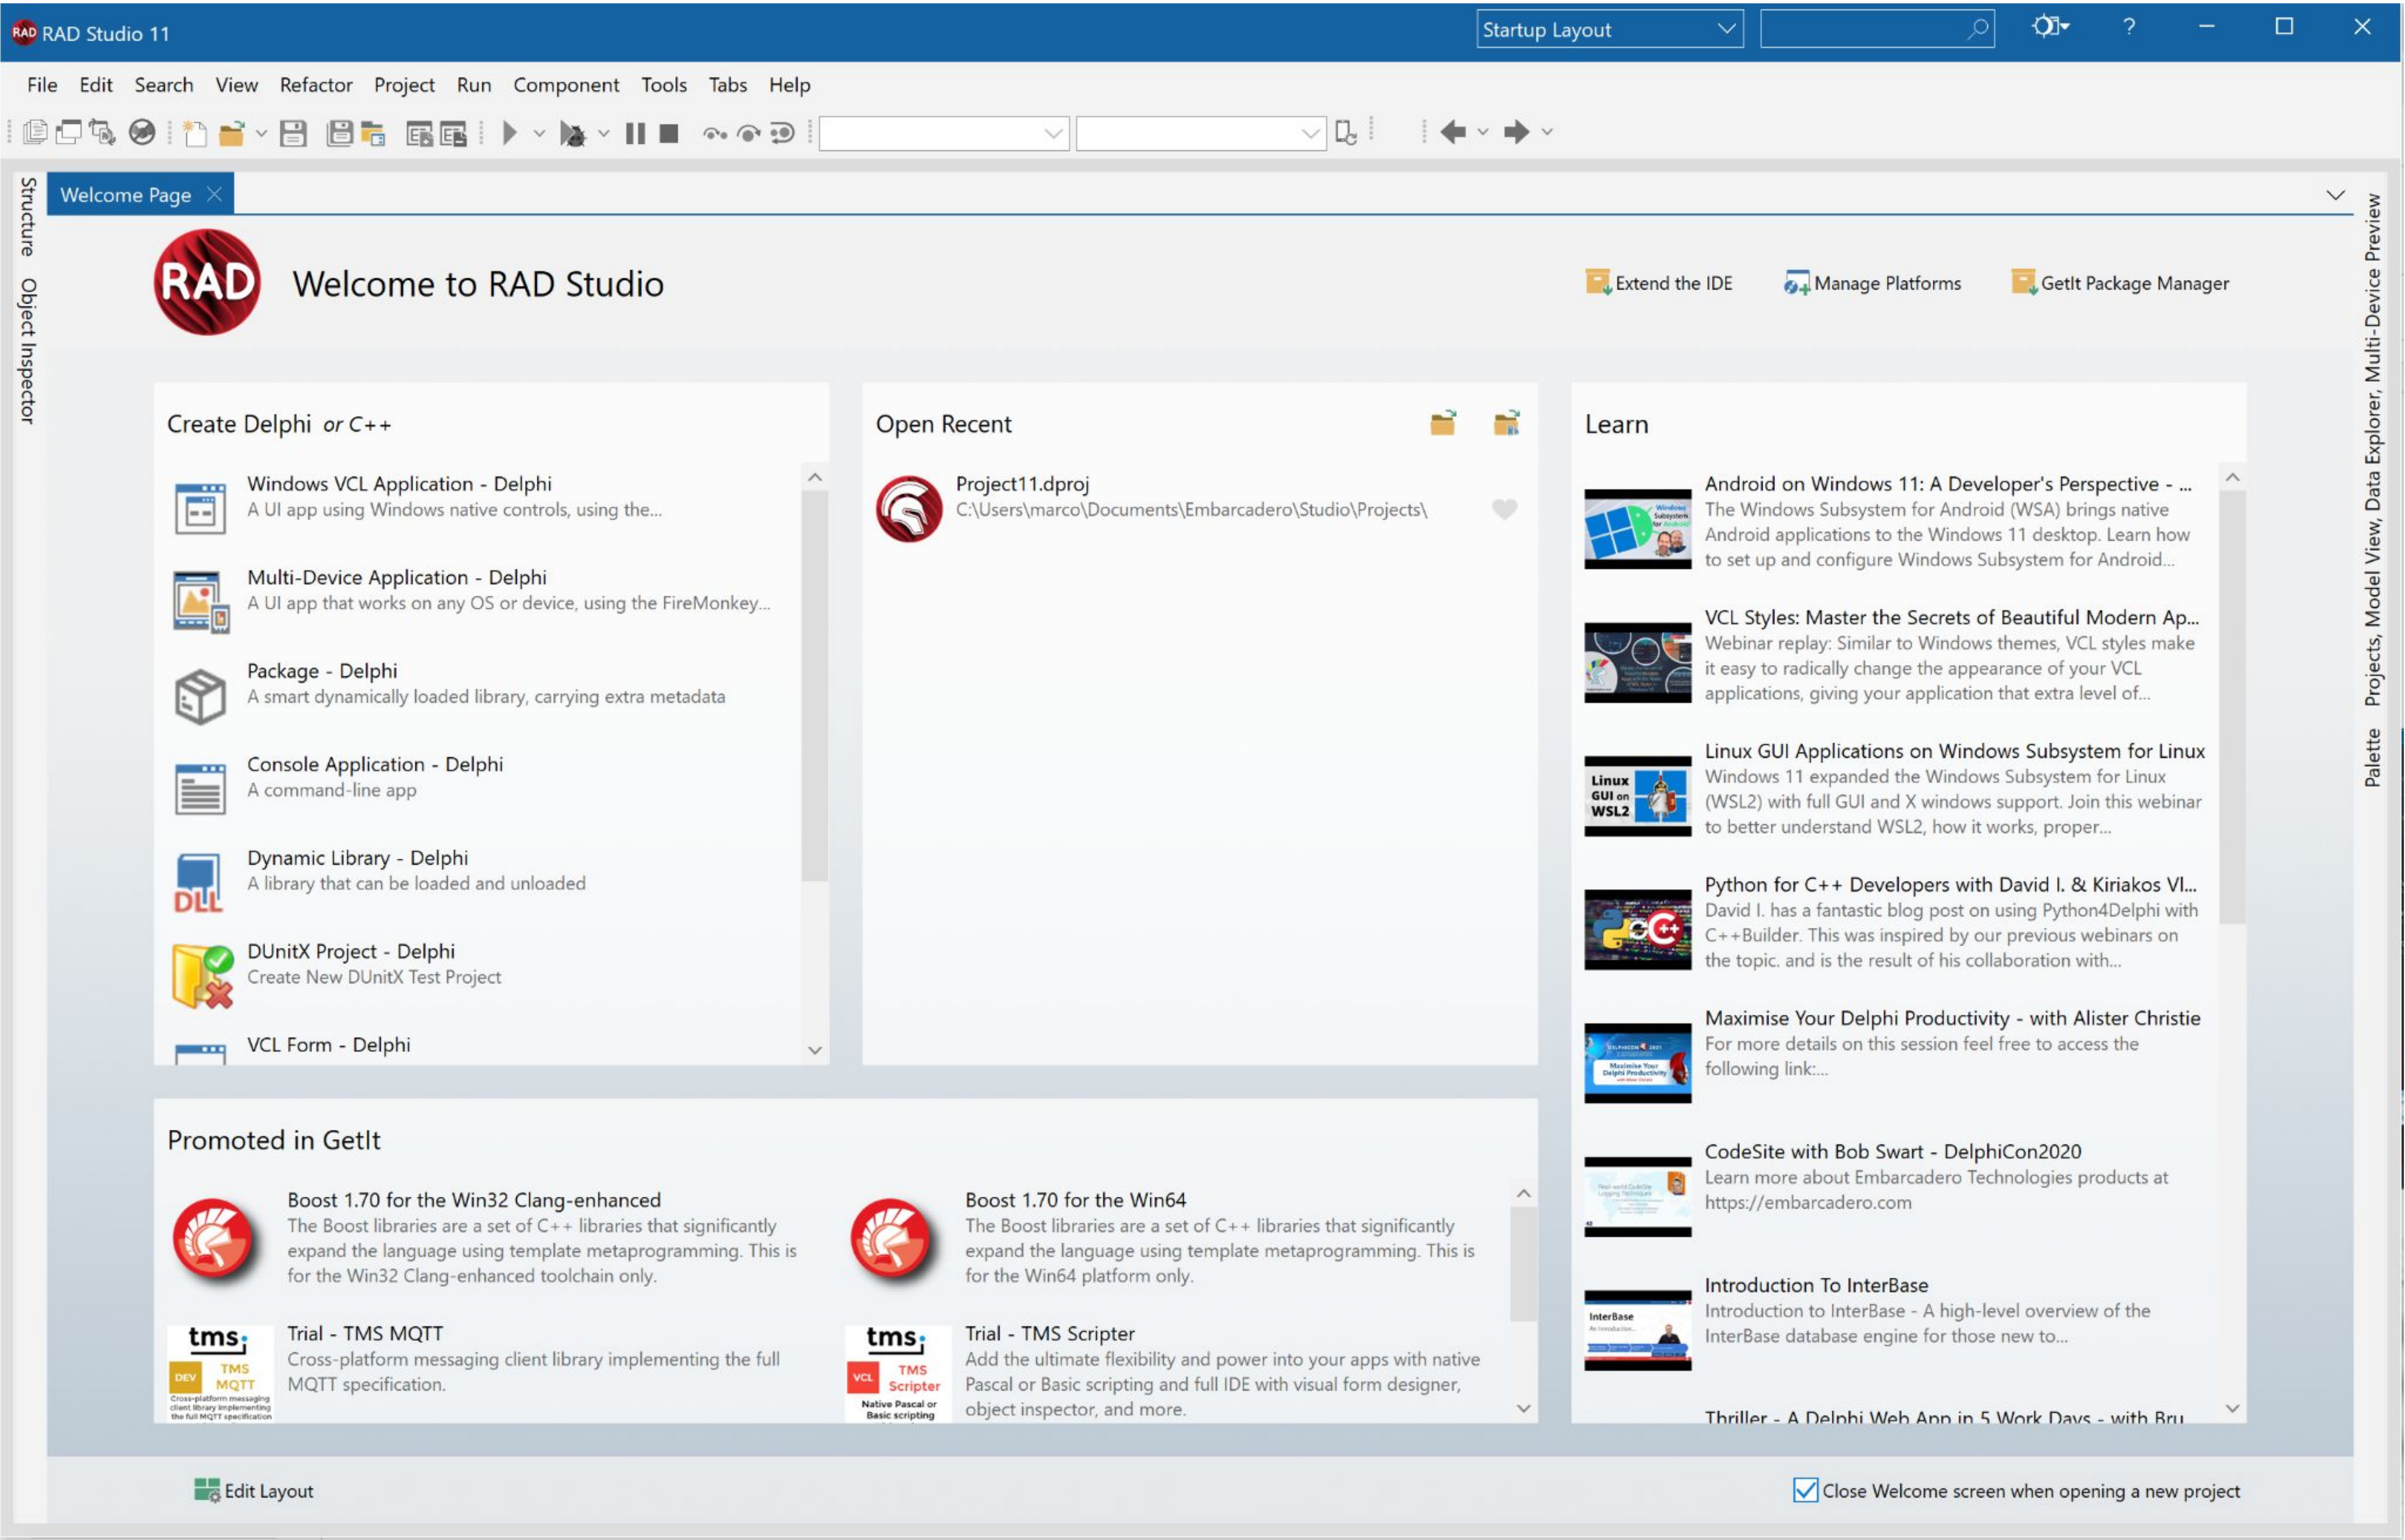

III. Platforms and Tooling

- Official support for Windows 11, macOS 12 Monterey , iOS 15, and Android 12 

IV. Libraries

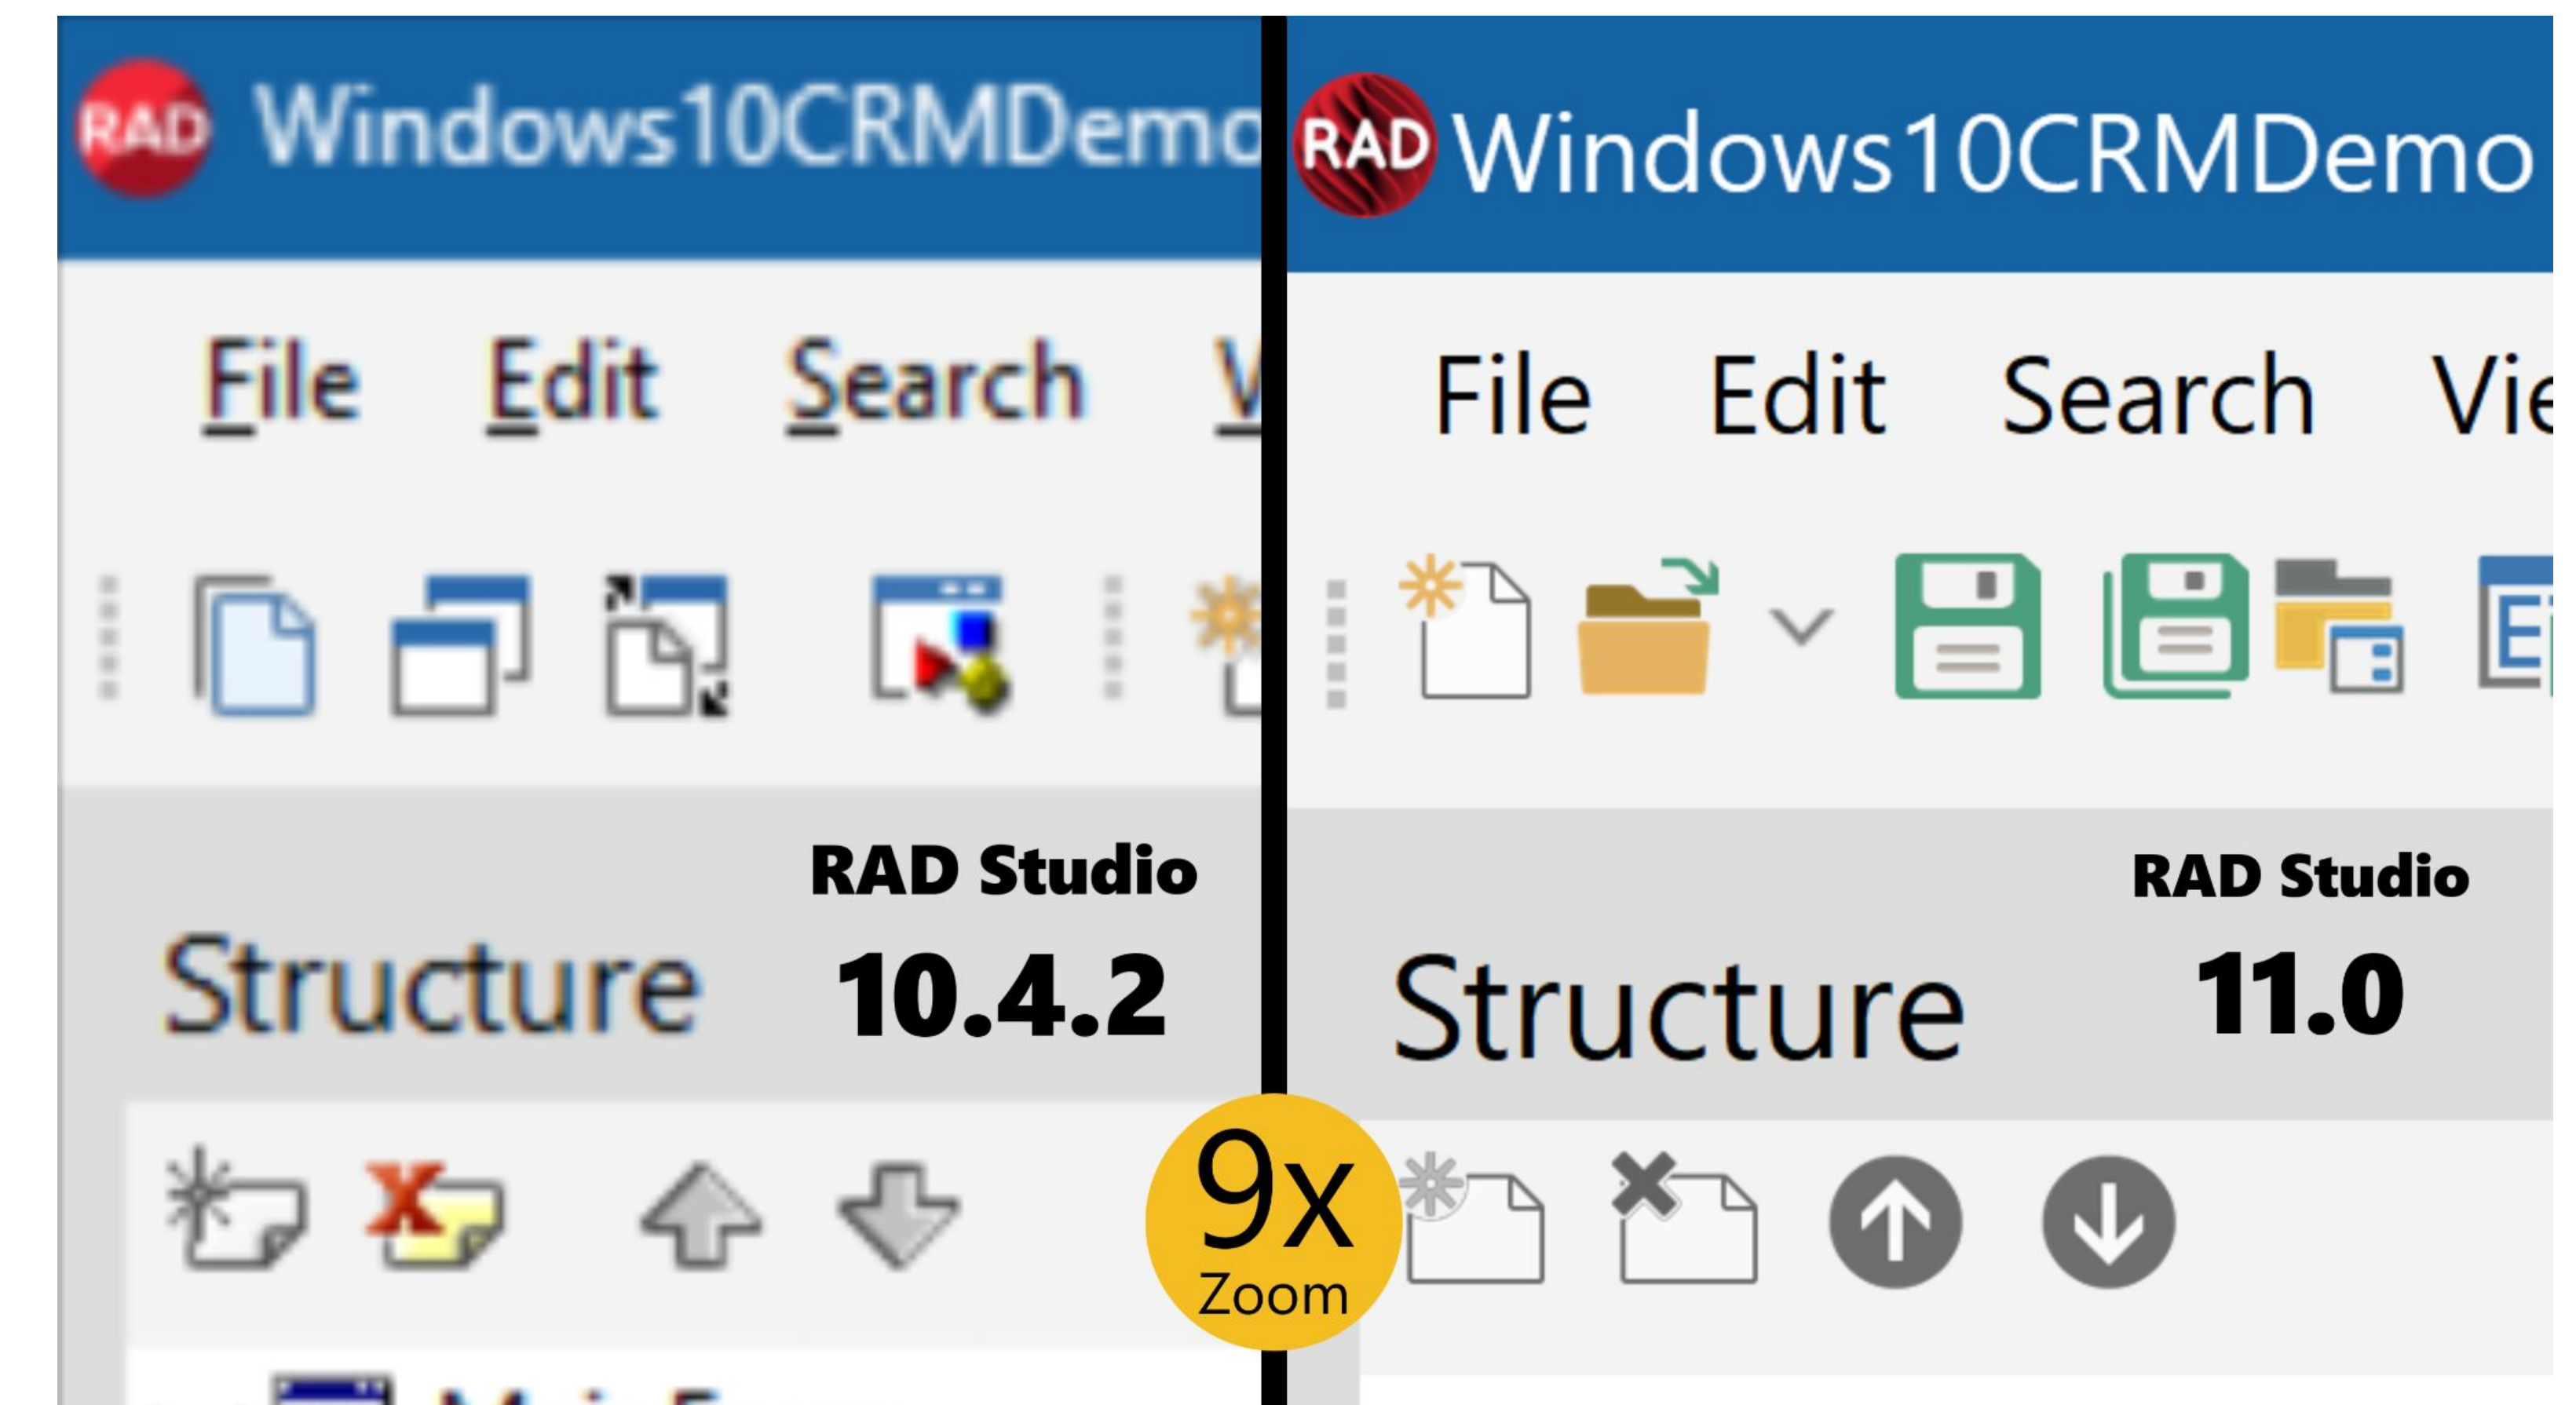

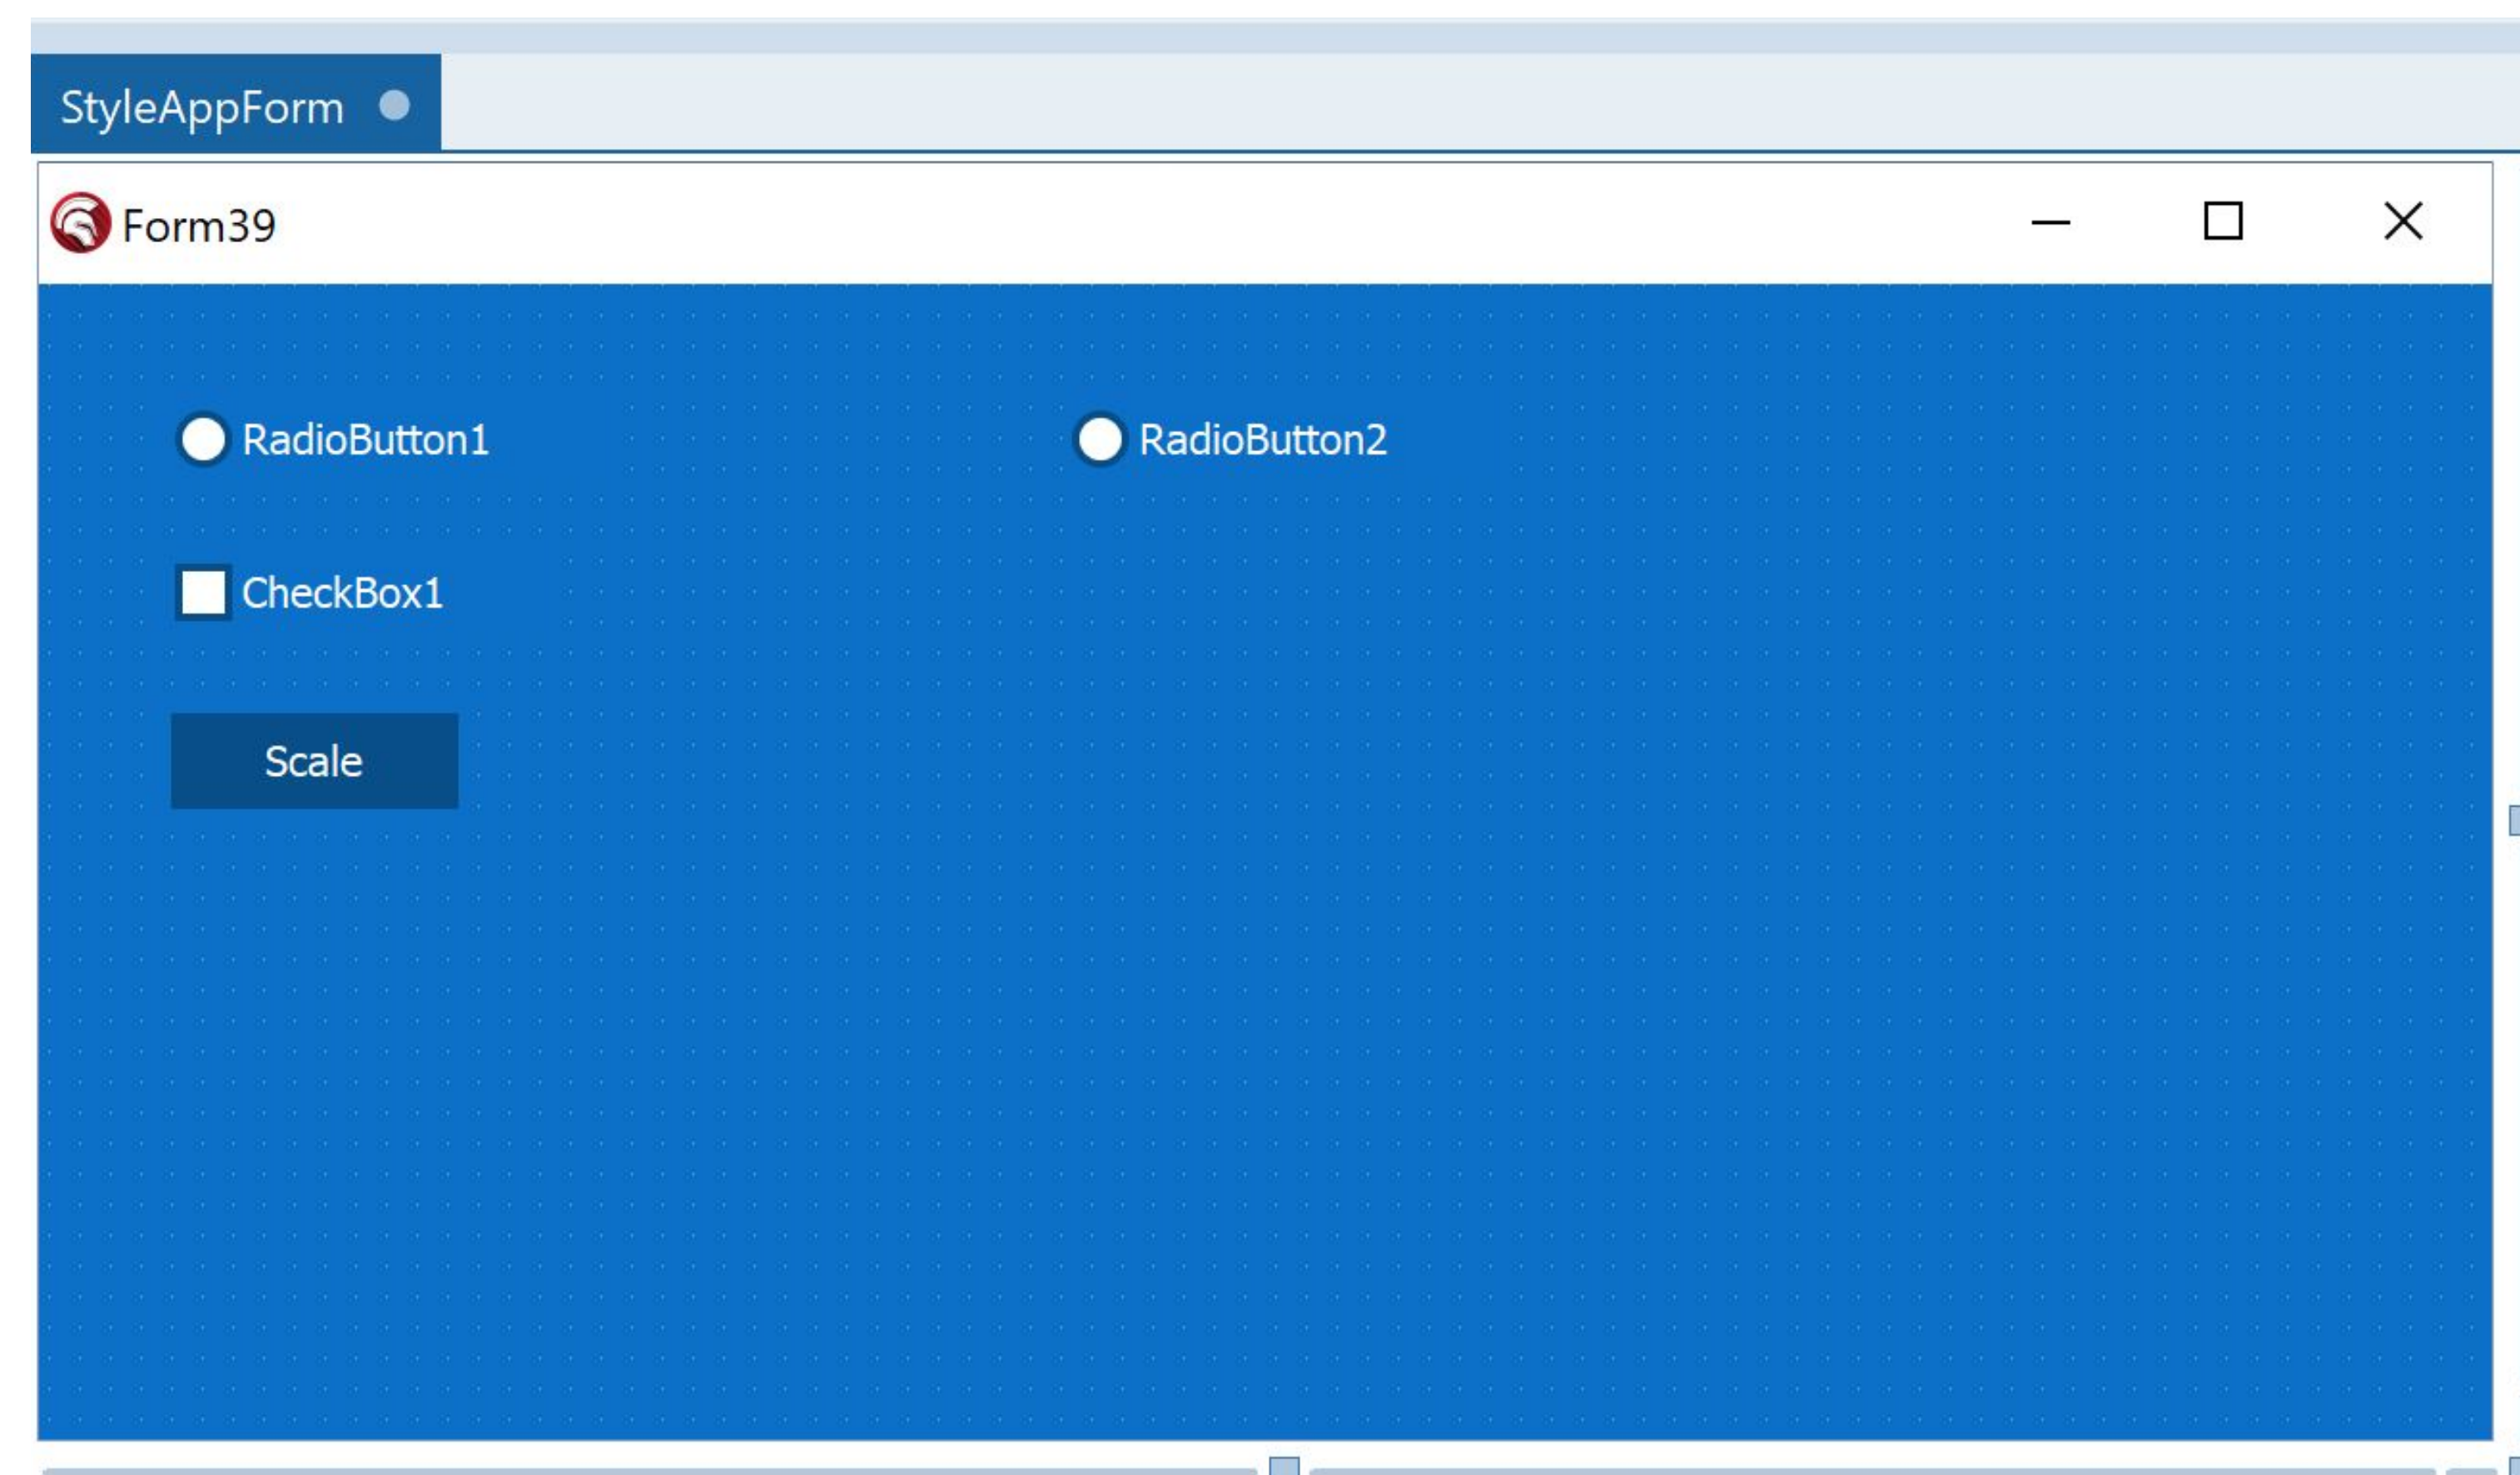

- Performance and quality improvements and small additions to Delphi RTL, database libraries, VCL, FireMonkey

I. RAD Studio IDE

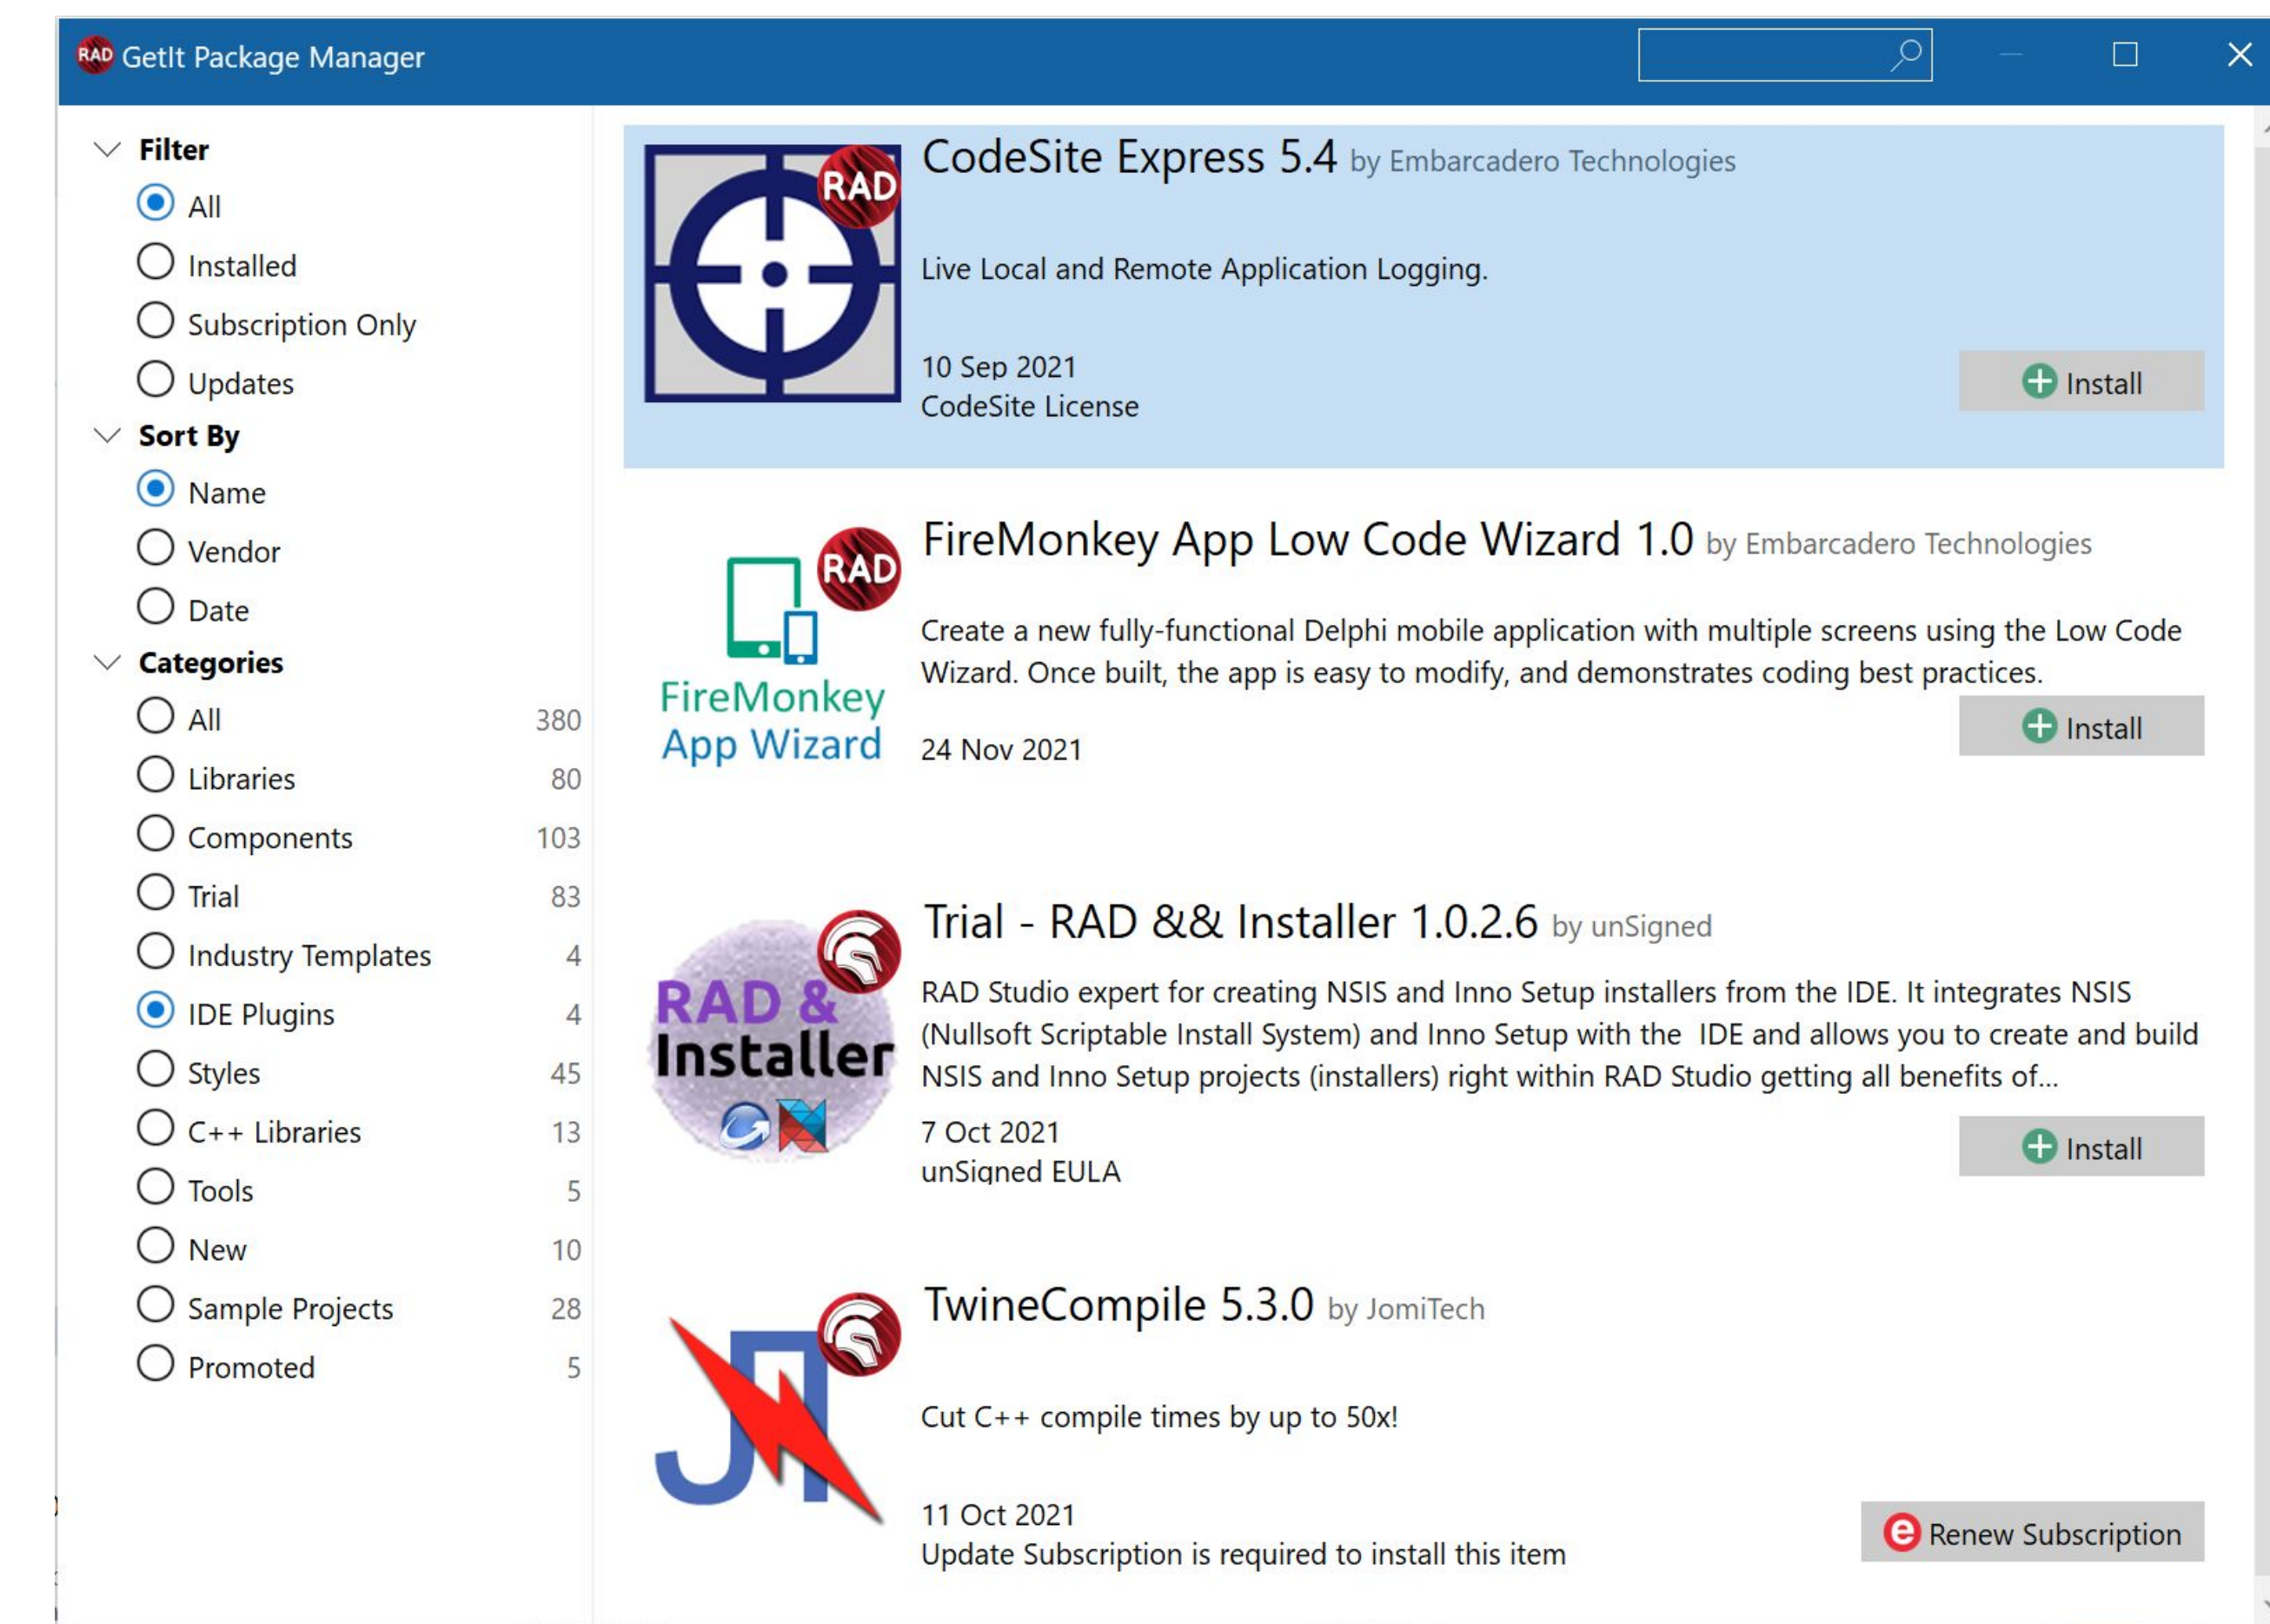

11.0: IDE and Designers

- High DPI IDE
 - Crisp fonts in all windows and the editor
- High DPI enabled form designer
- Active Styles in VCL Designer

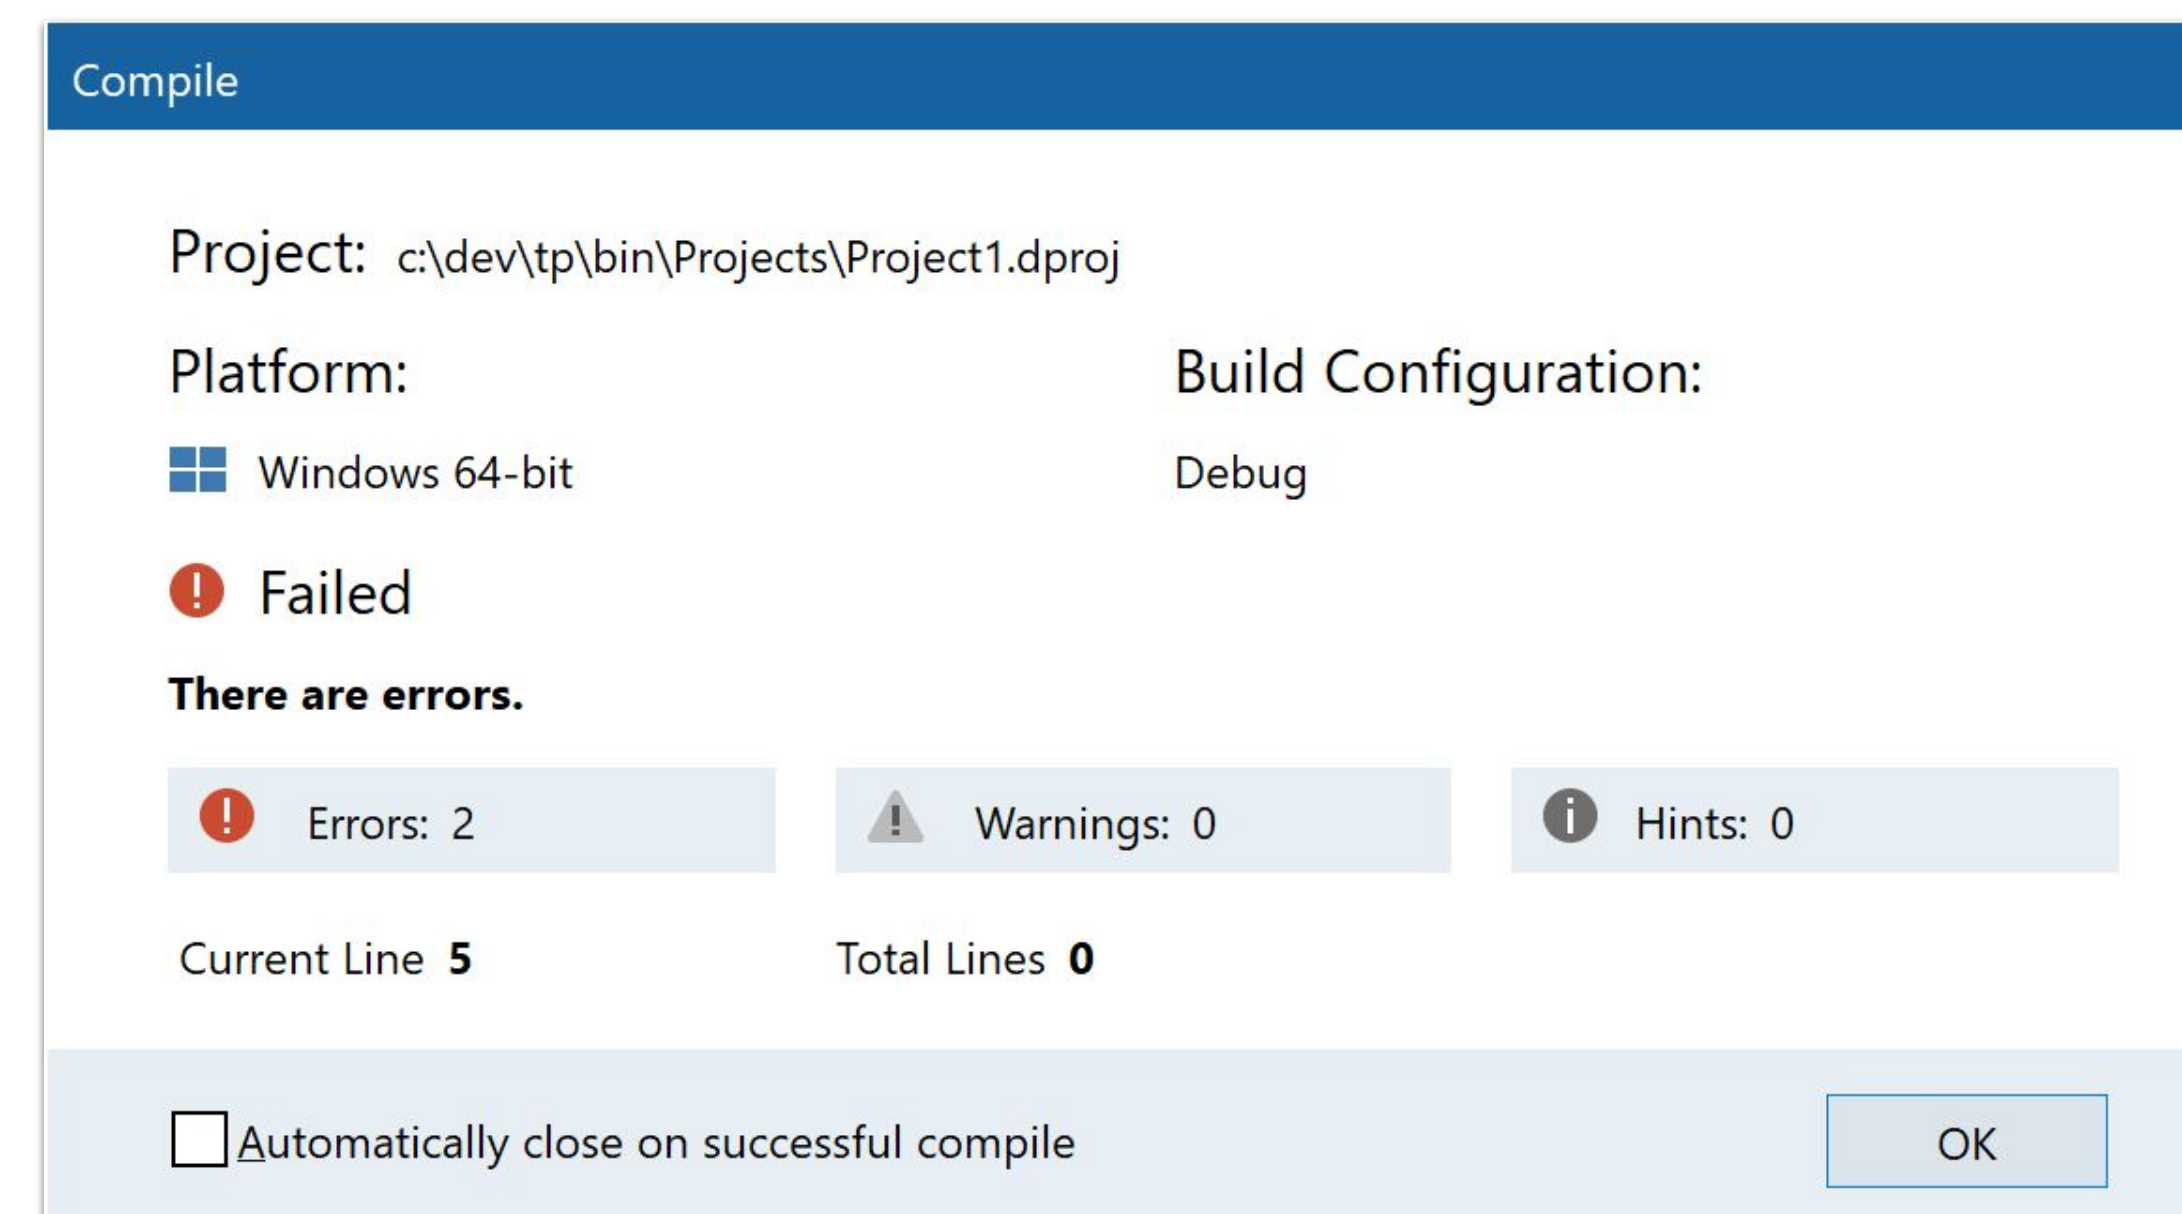

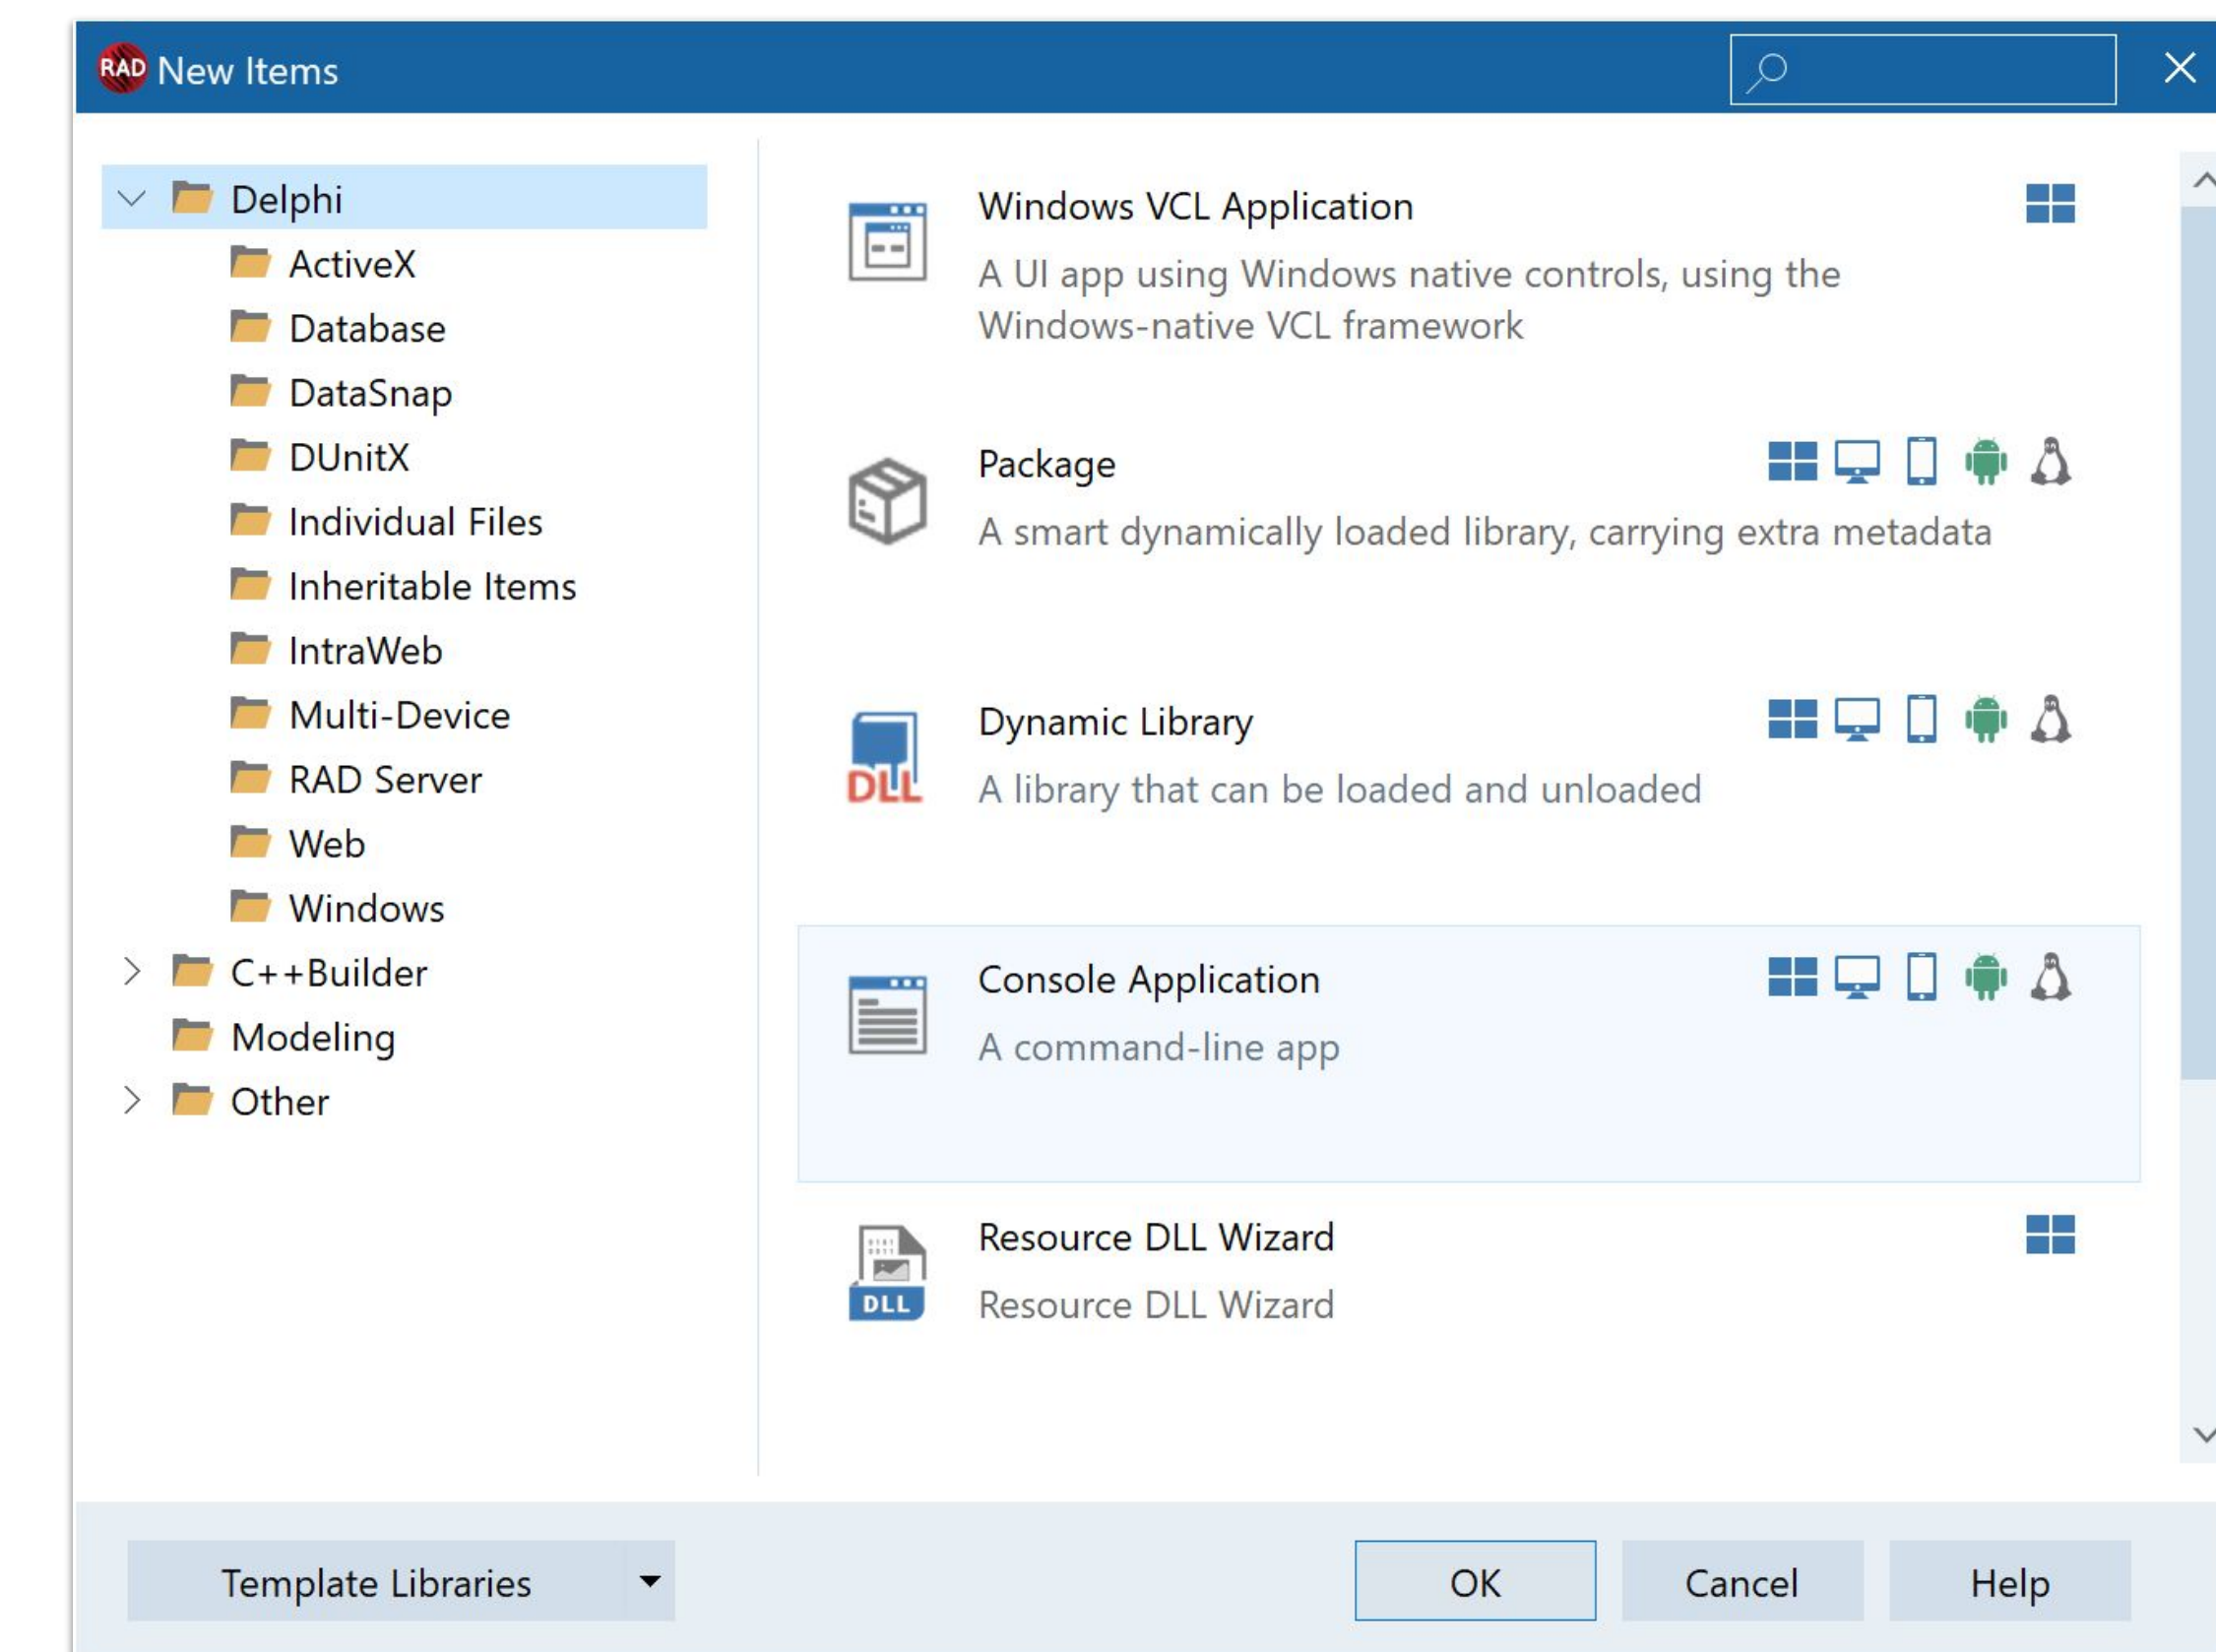

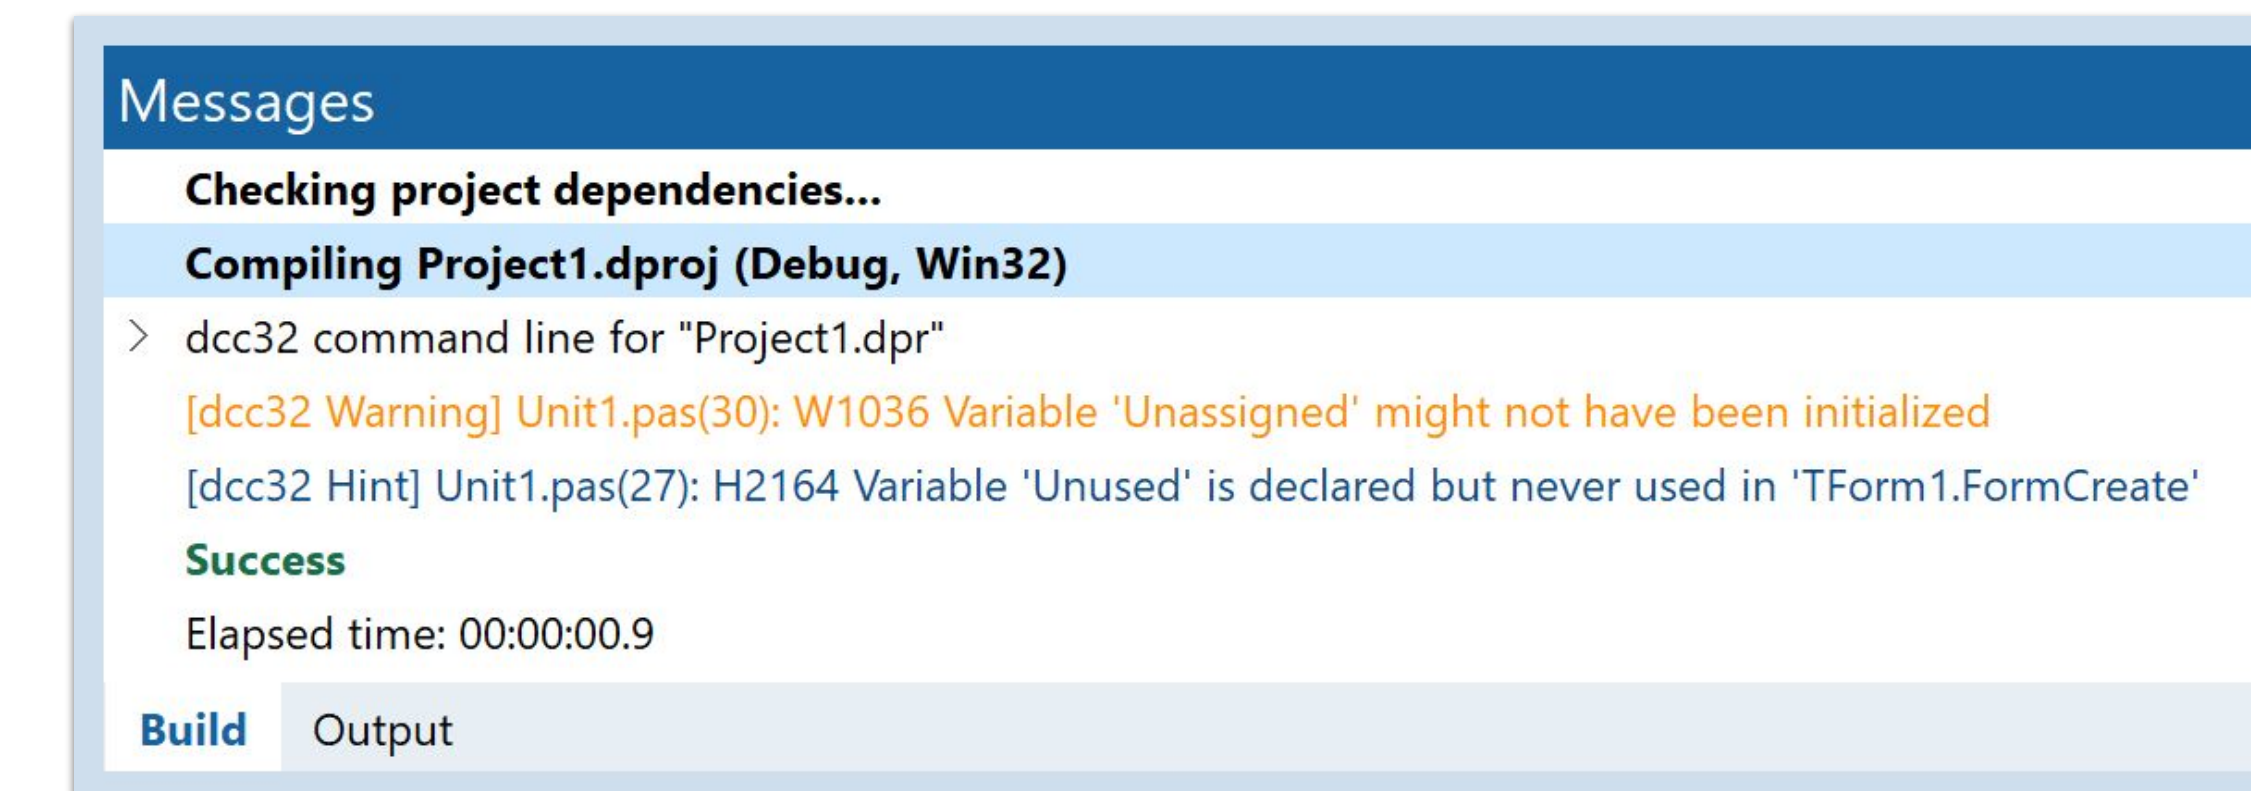

11.1: IDE Quality

- Extensive High DPI IDE quality
 - Better use of the IDE with Remote Desktop
 - Improvements in Toolbar, font sizing
 - Better scaling when dragging windows between different resolution monitors
 - Additional IDE Fix Pack integration
- Improved High DPI designers for VCL and FireMonkey and the styled VCL form designer
- GetIt dialog enhancements with image caching and reworked UI (based on VCL TControlList)
- “Start working” in user mode

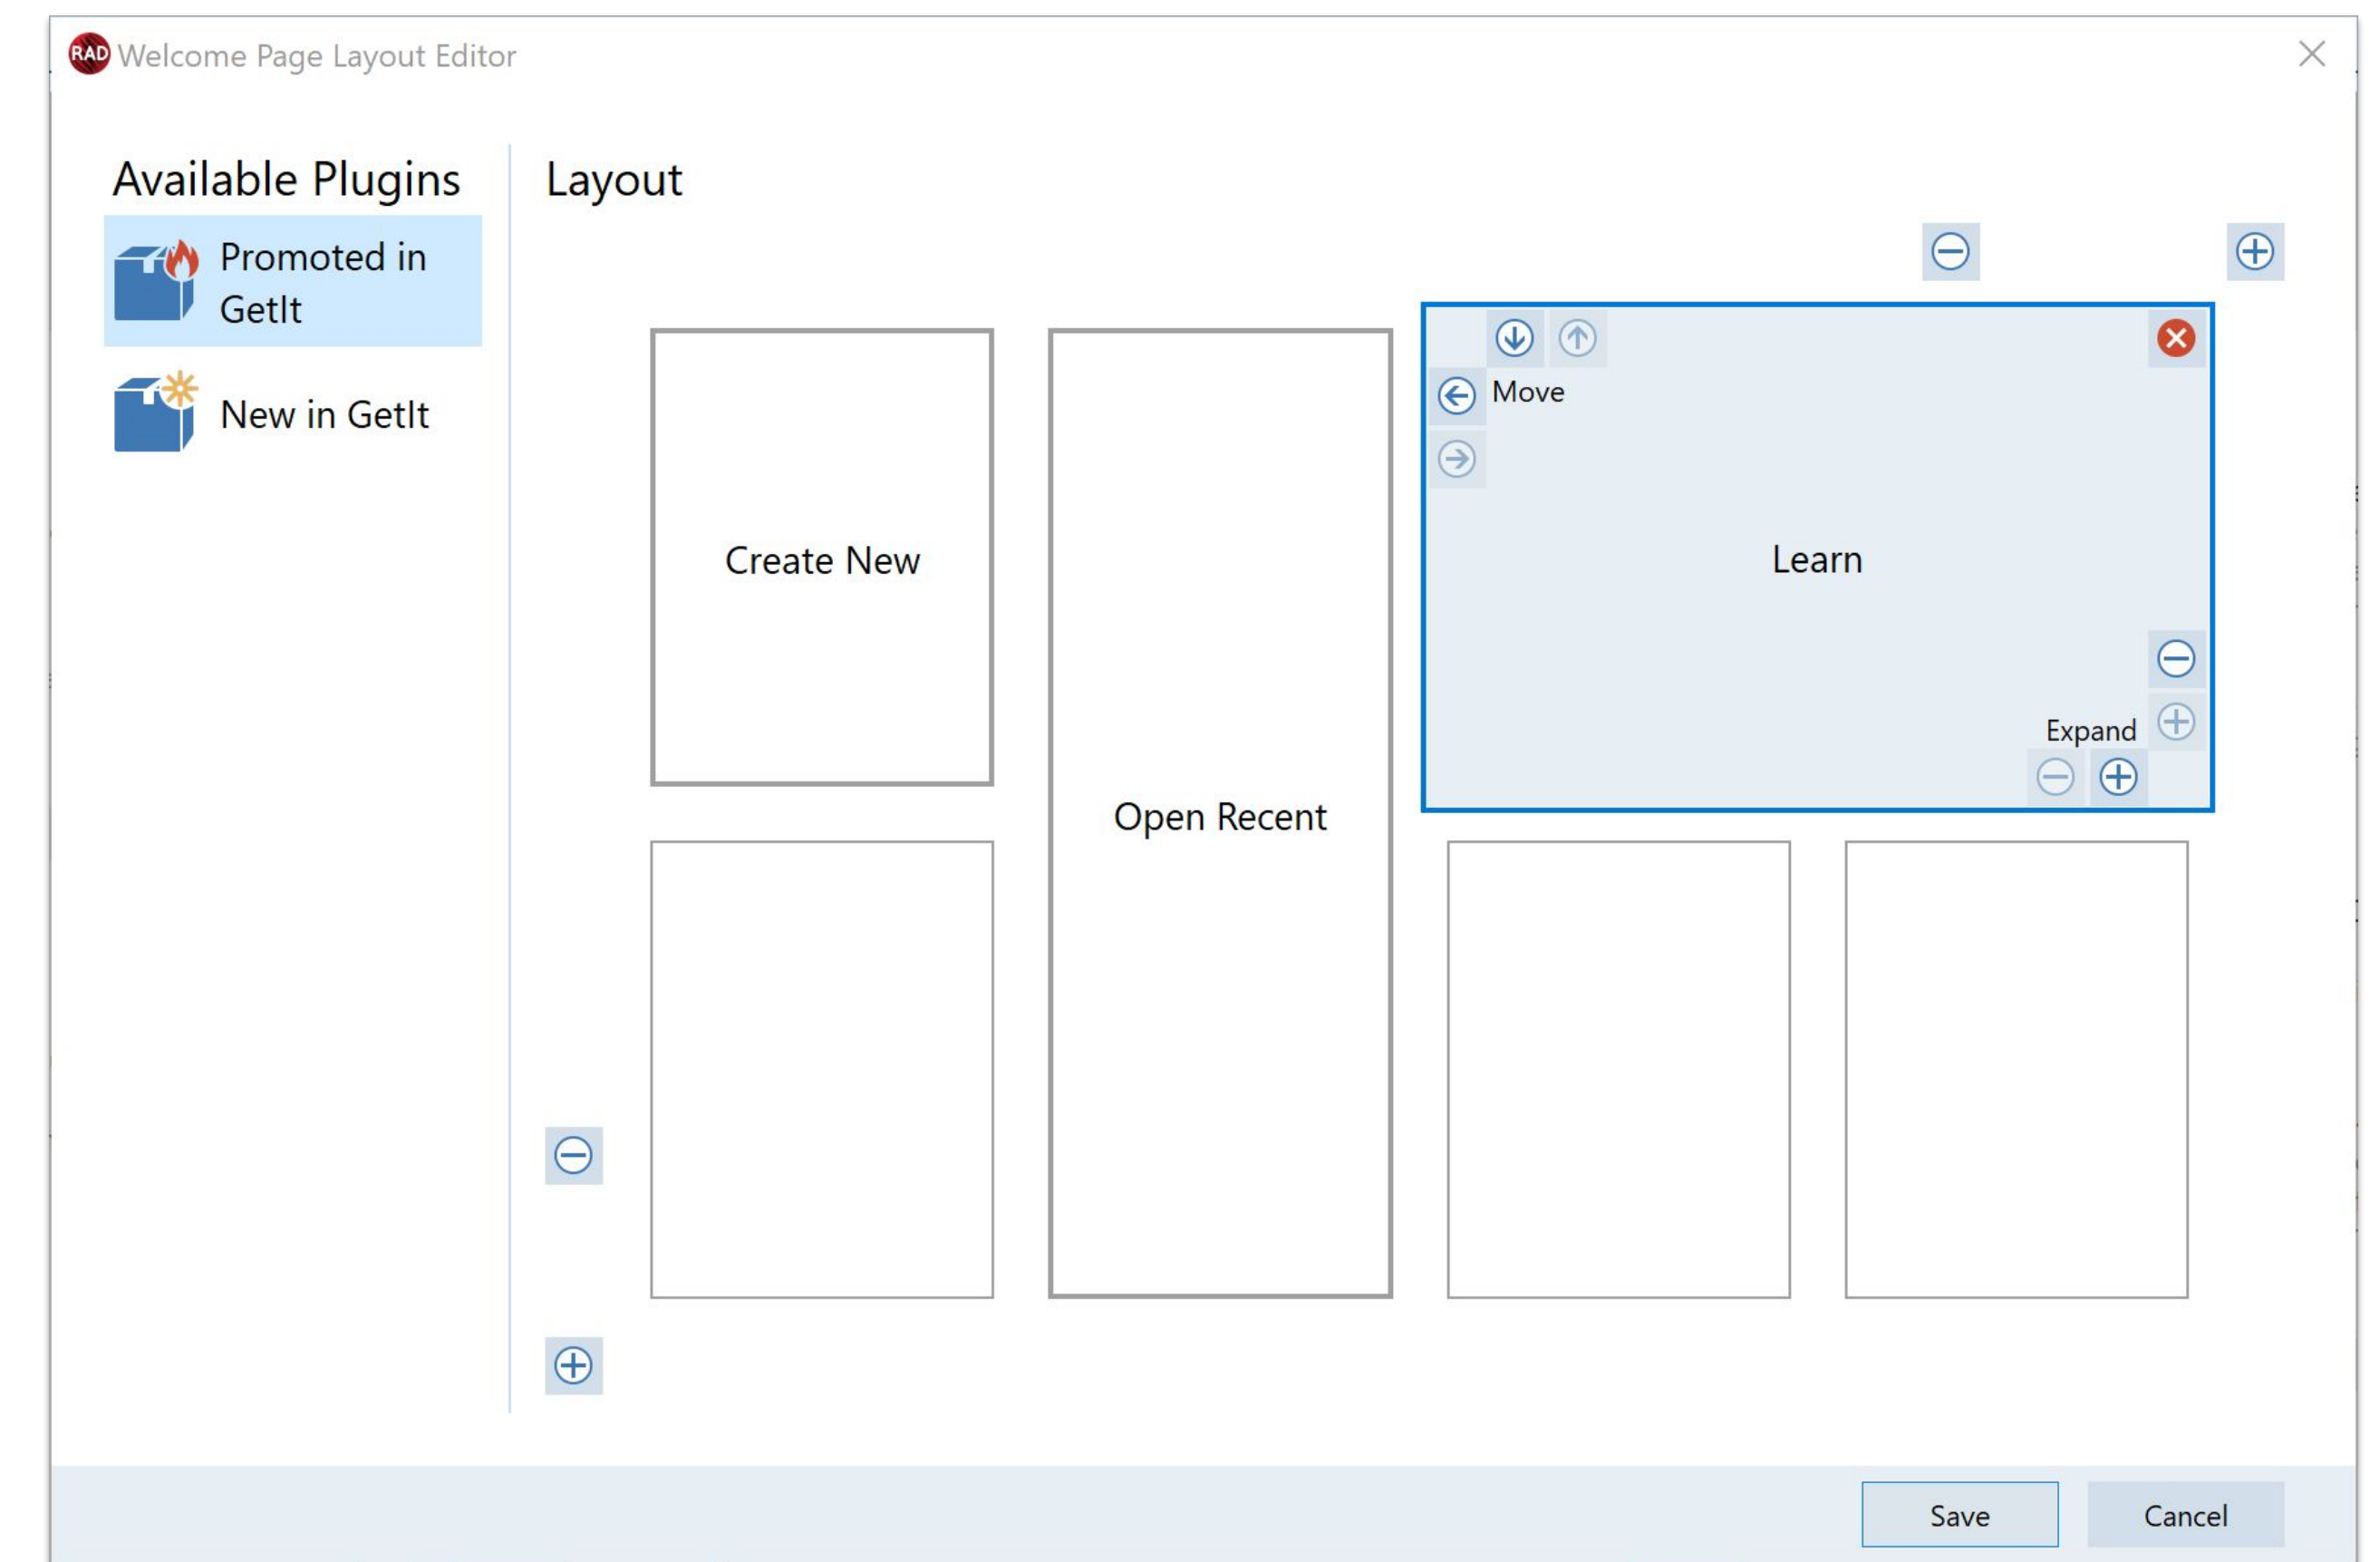

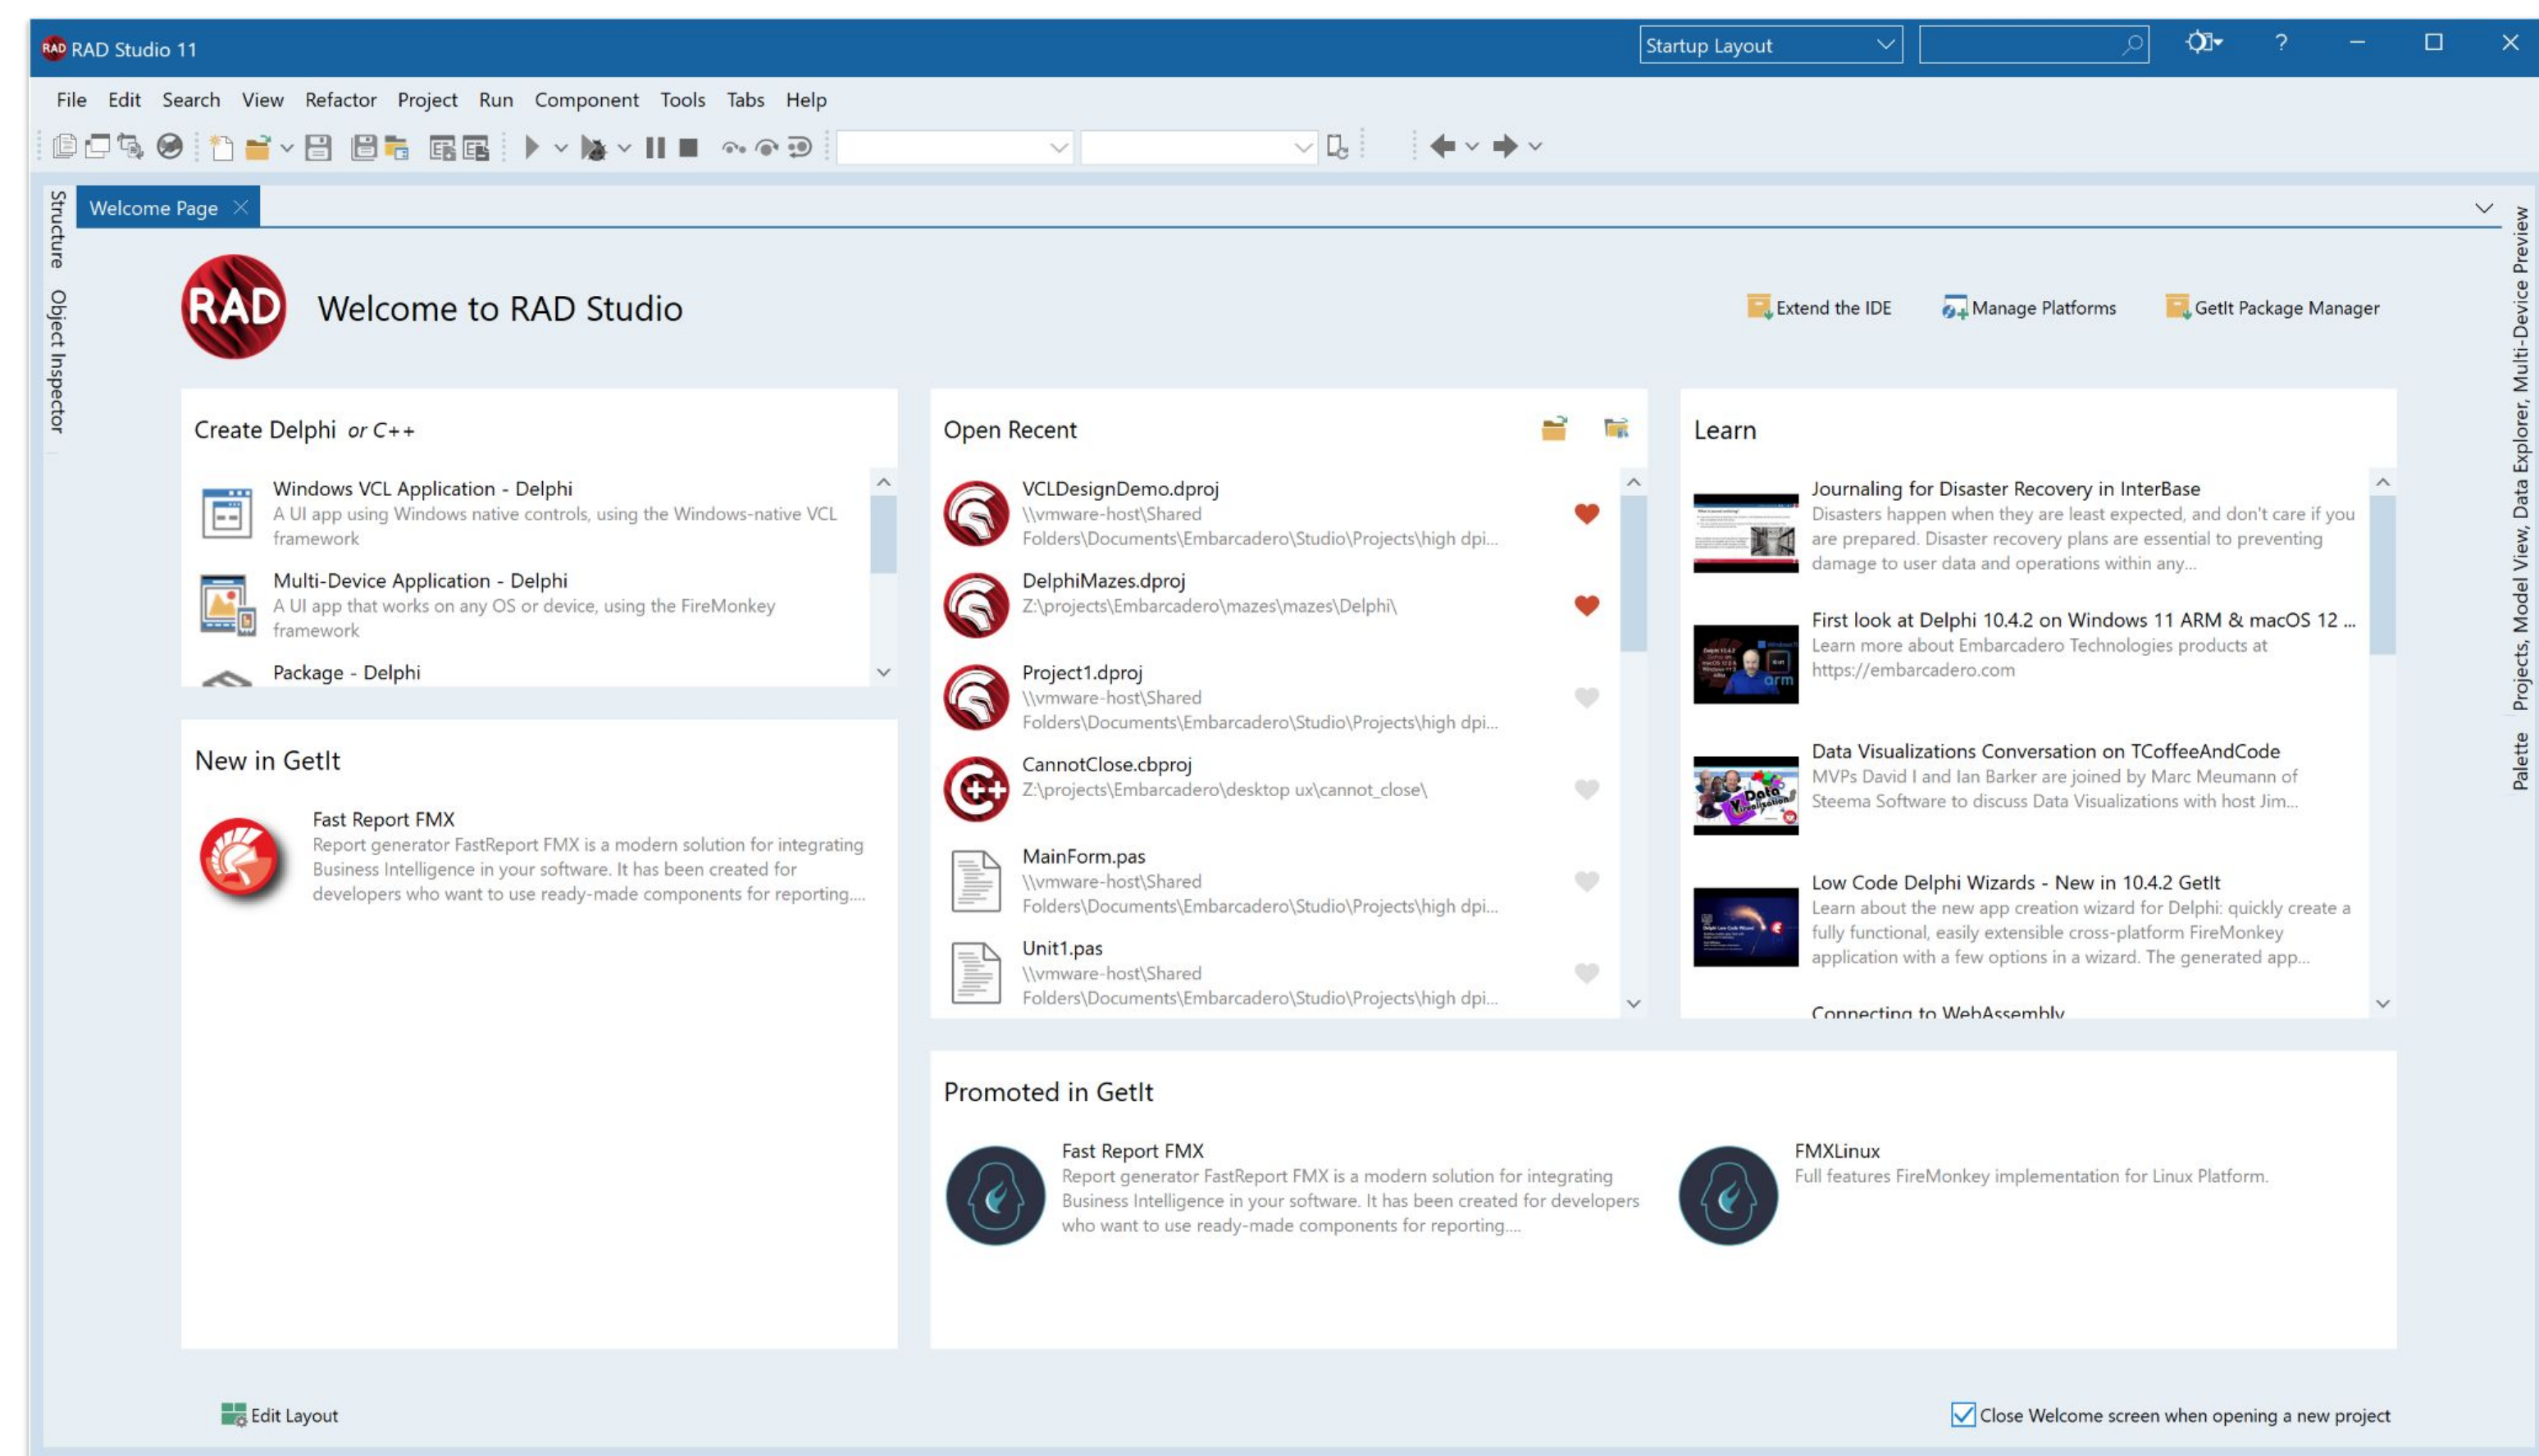

11.1: IDE Enhancements

- Messages view: errors, warnings, and hints are differentiated by color (the colors can be customized)
- New Items dialog: available platforms for each item
 - Also uses TControlList and offers other views
- The Compile dialog shows the platform and build configuration

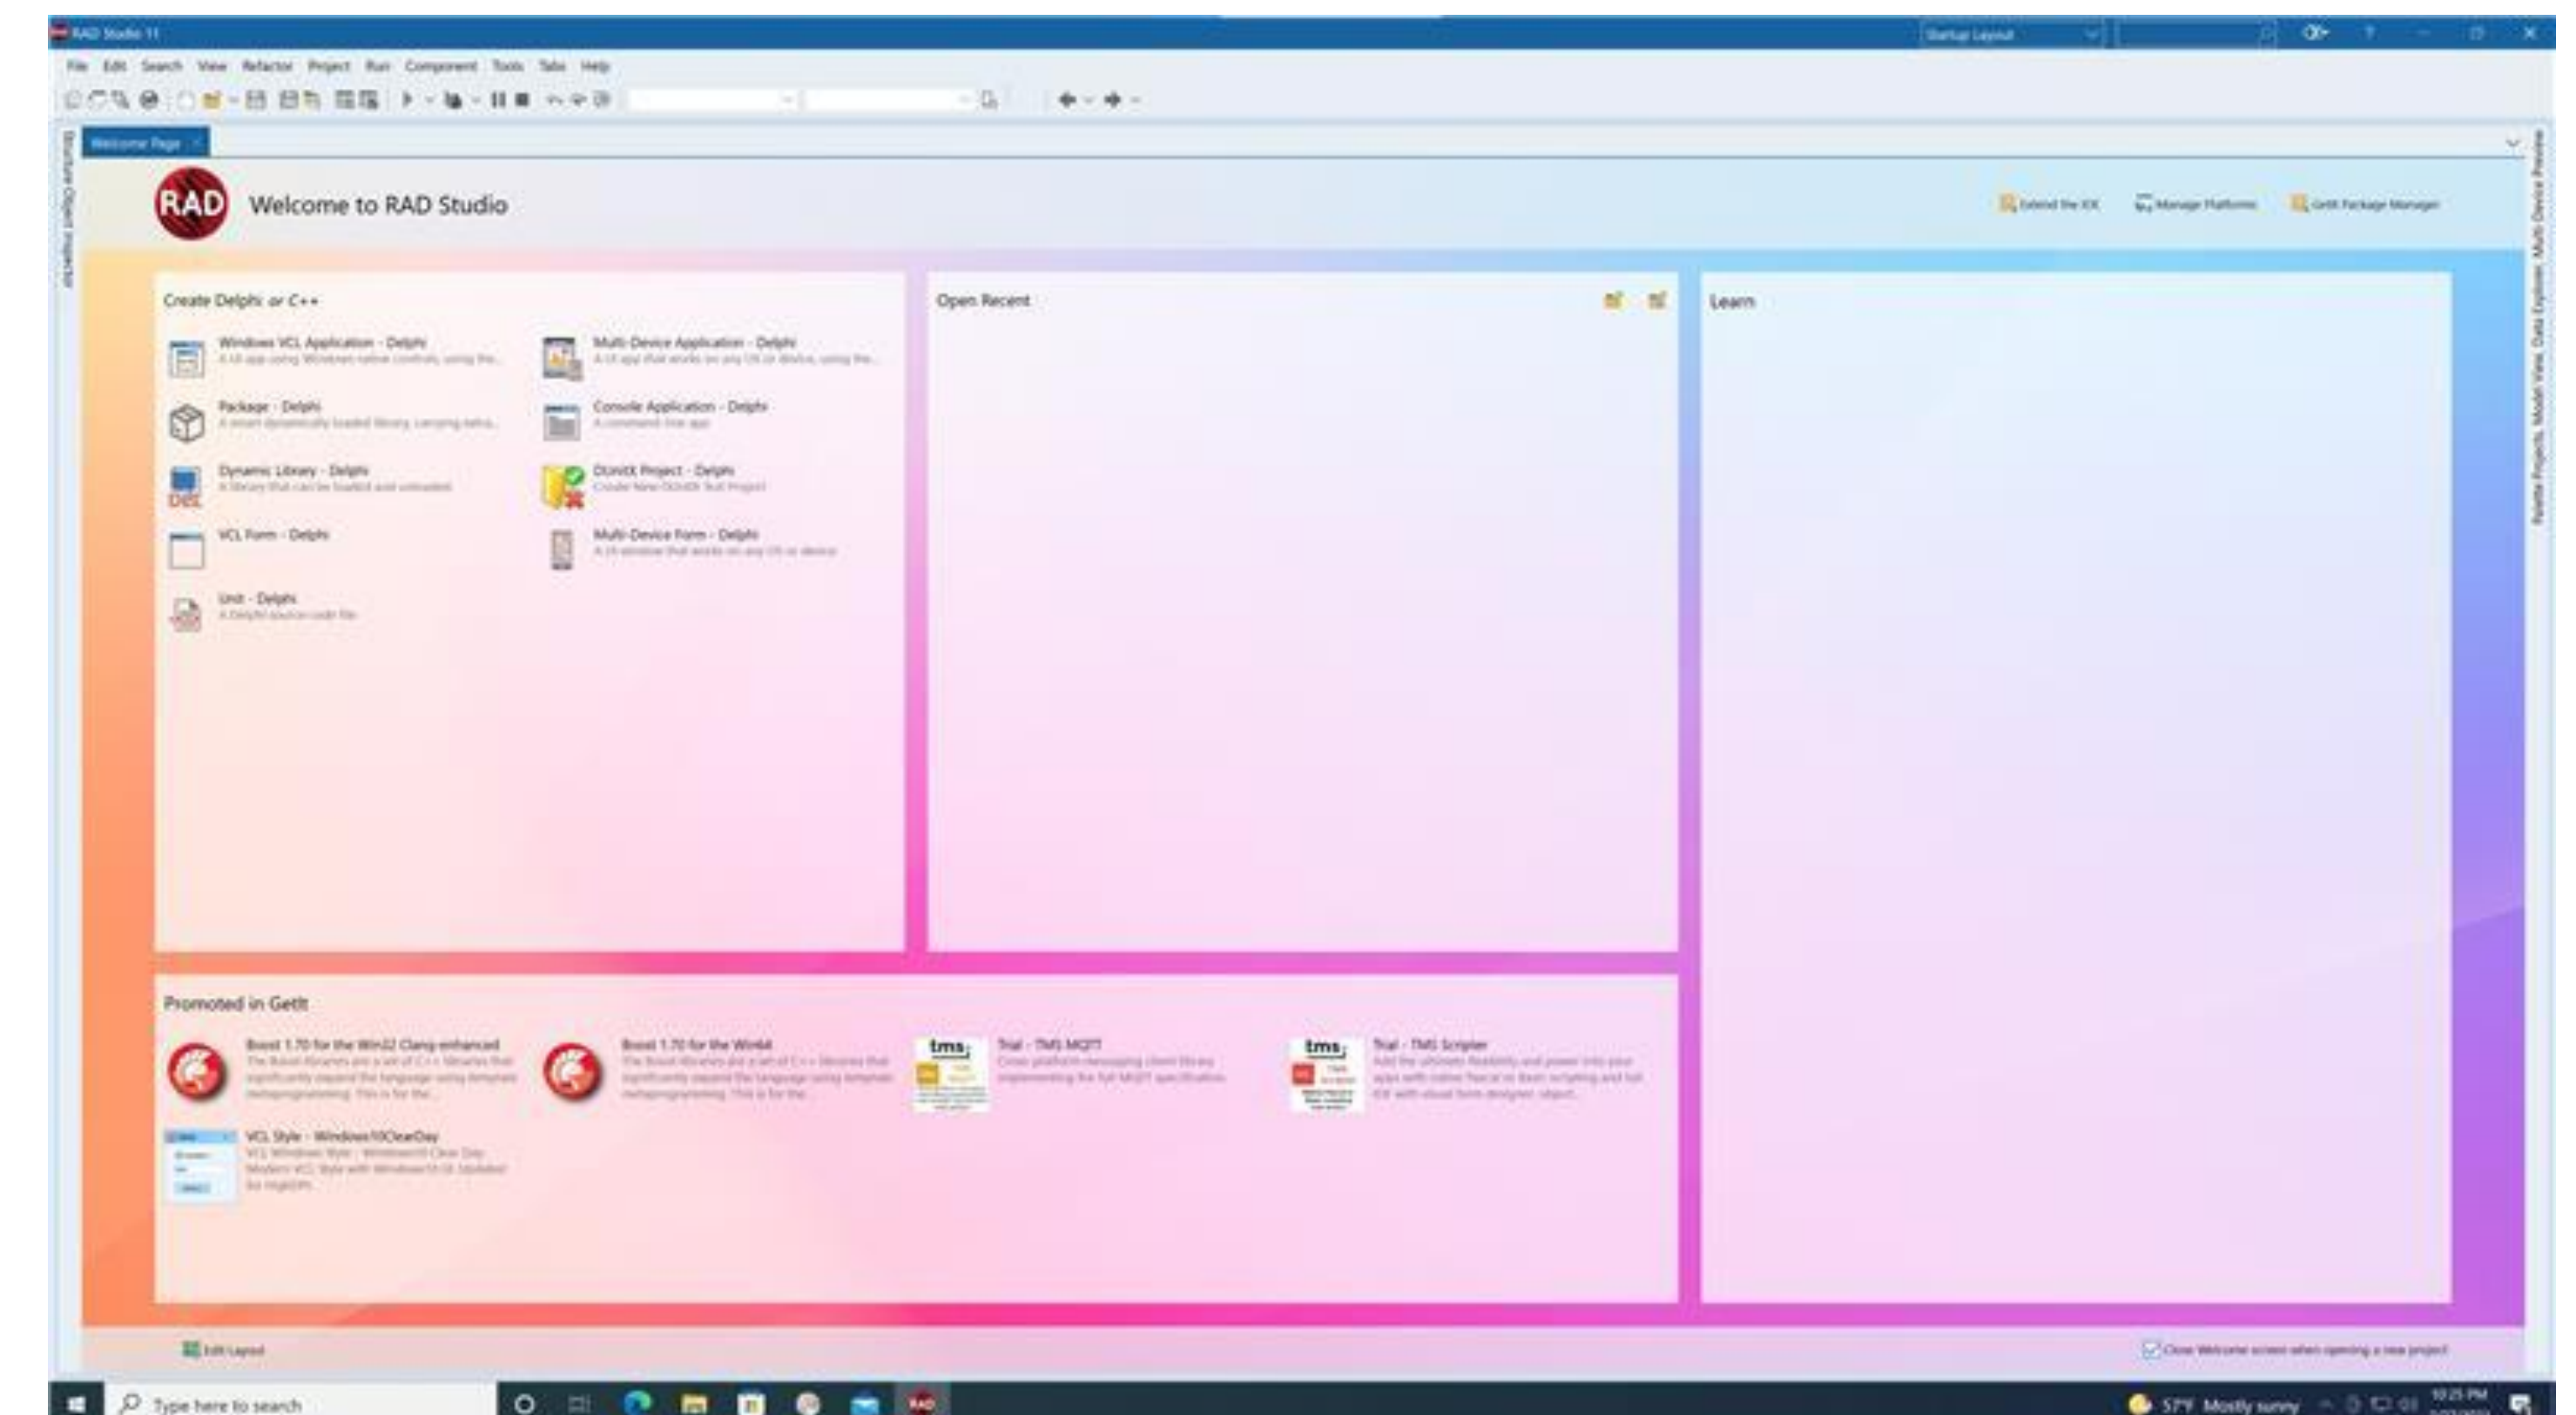

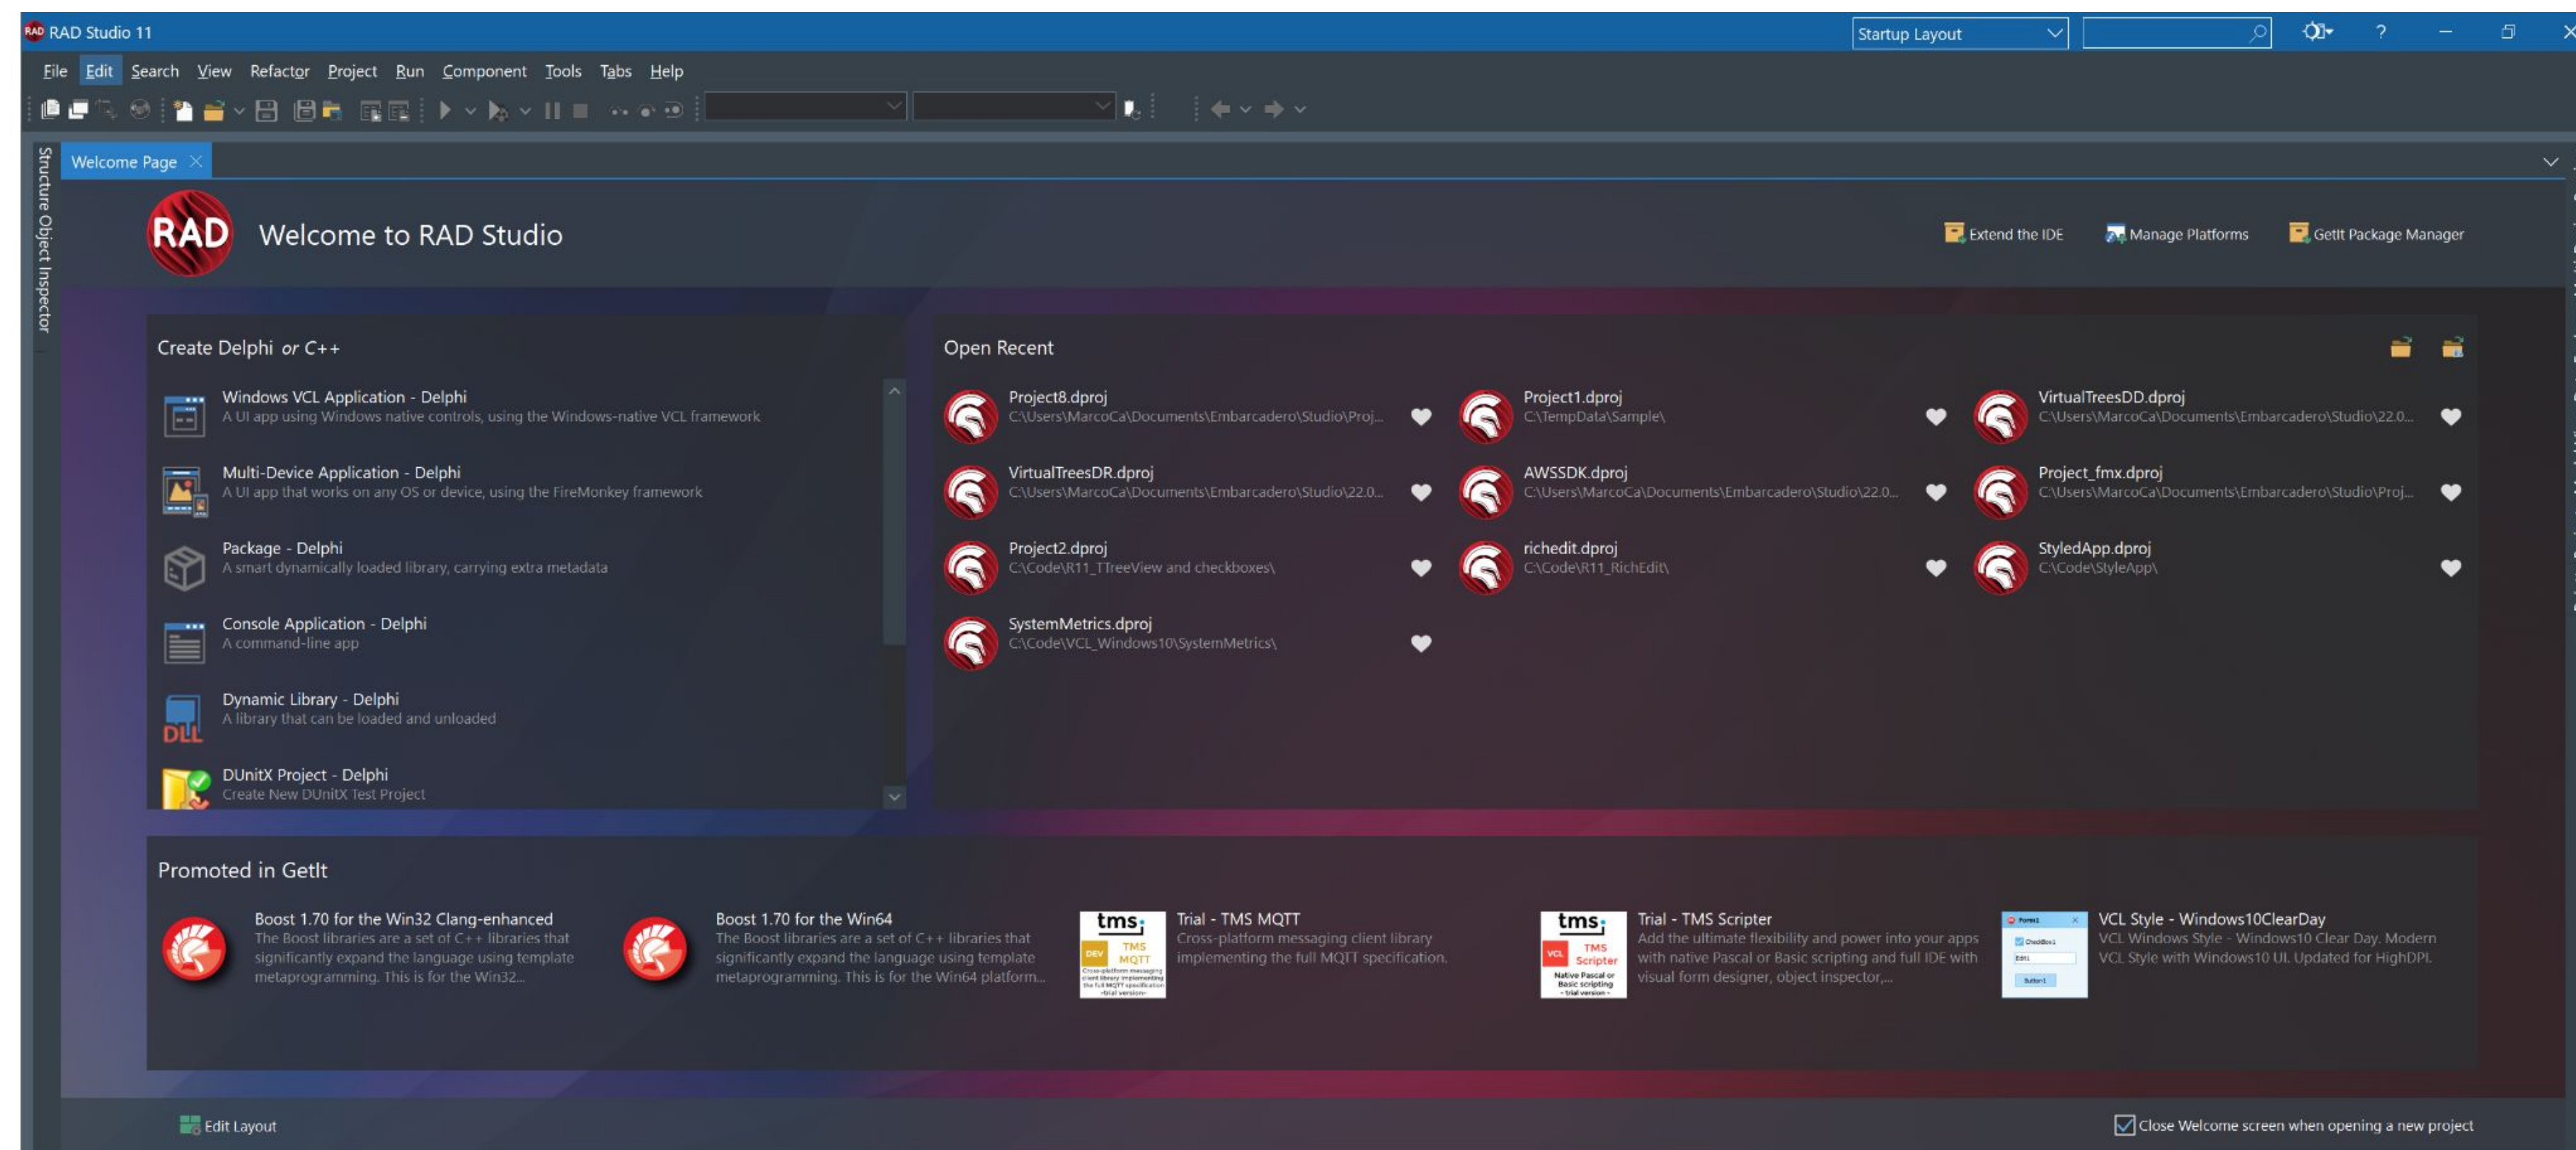

11.0: New Welcome Page

- New native Welcome page, VCL based and flexible
- Layout and content is fully customizable: show what and where you want

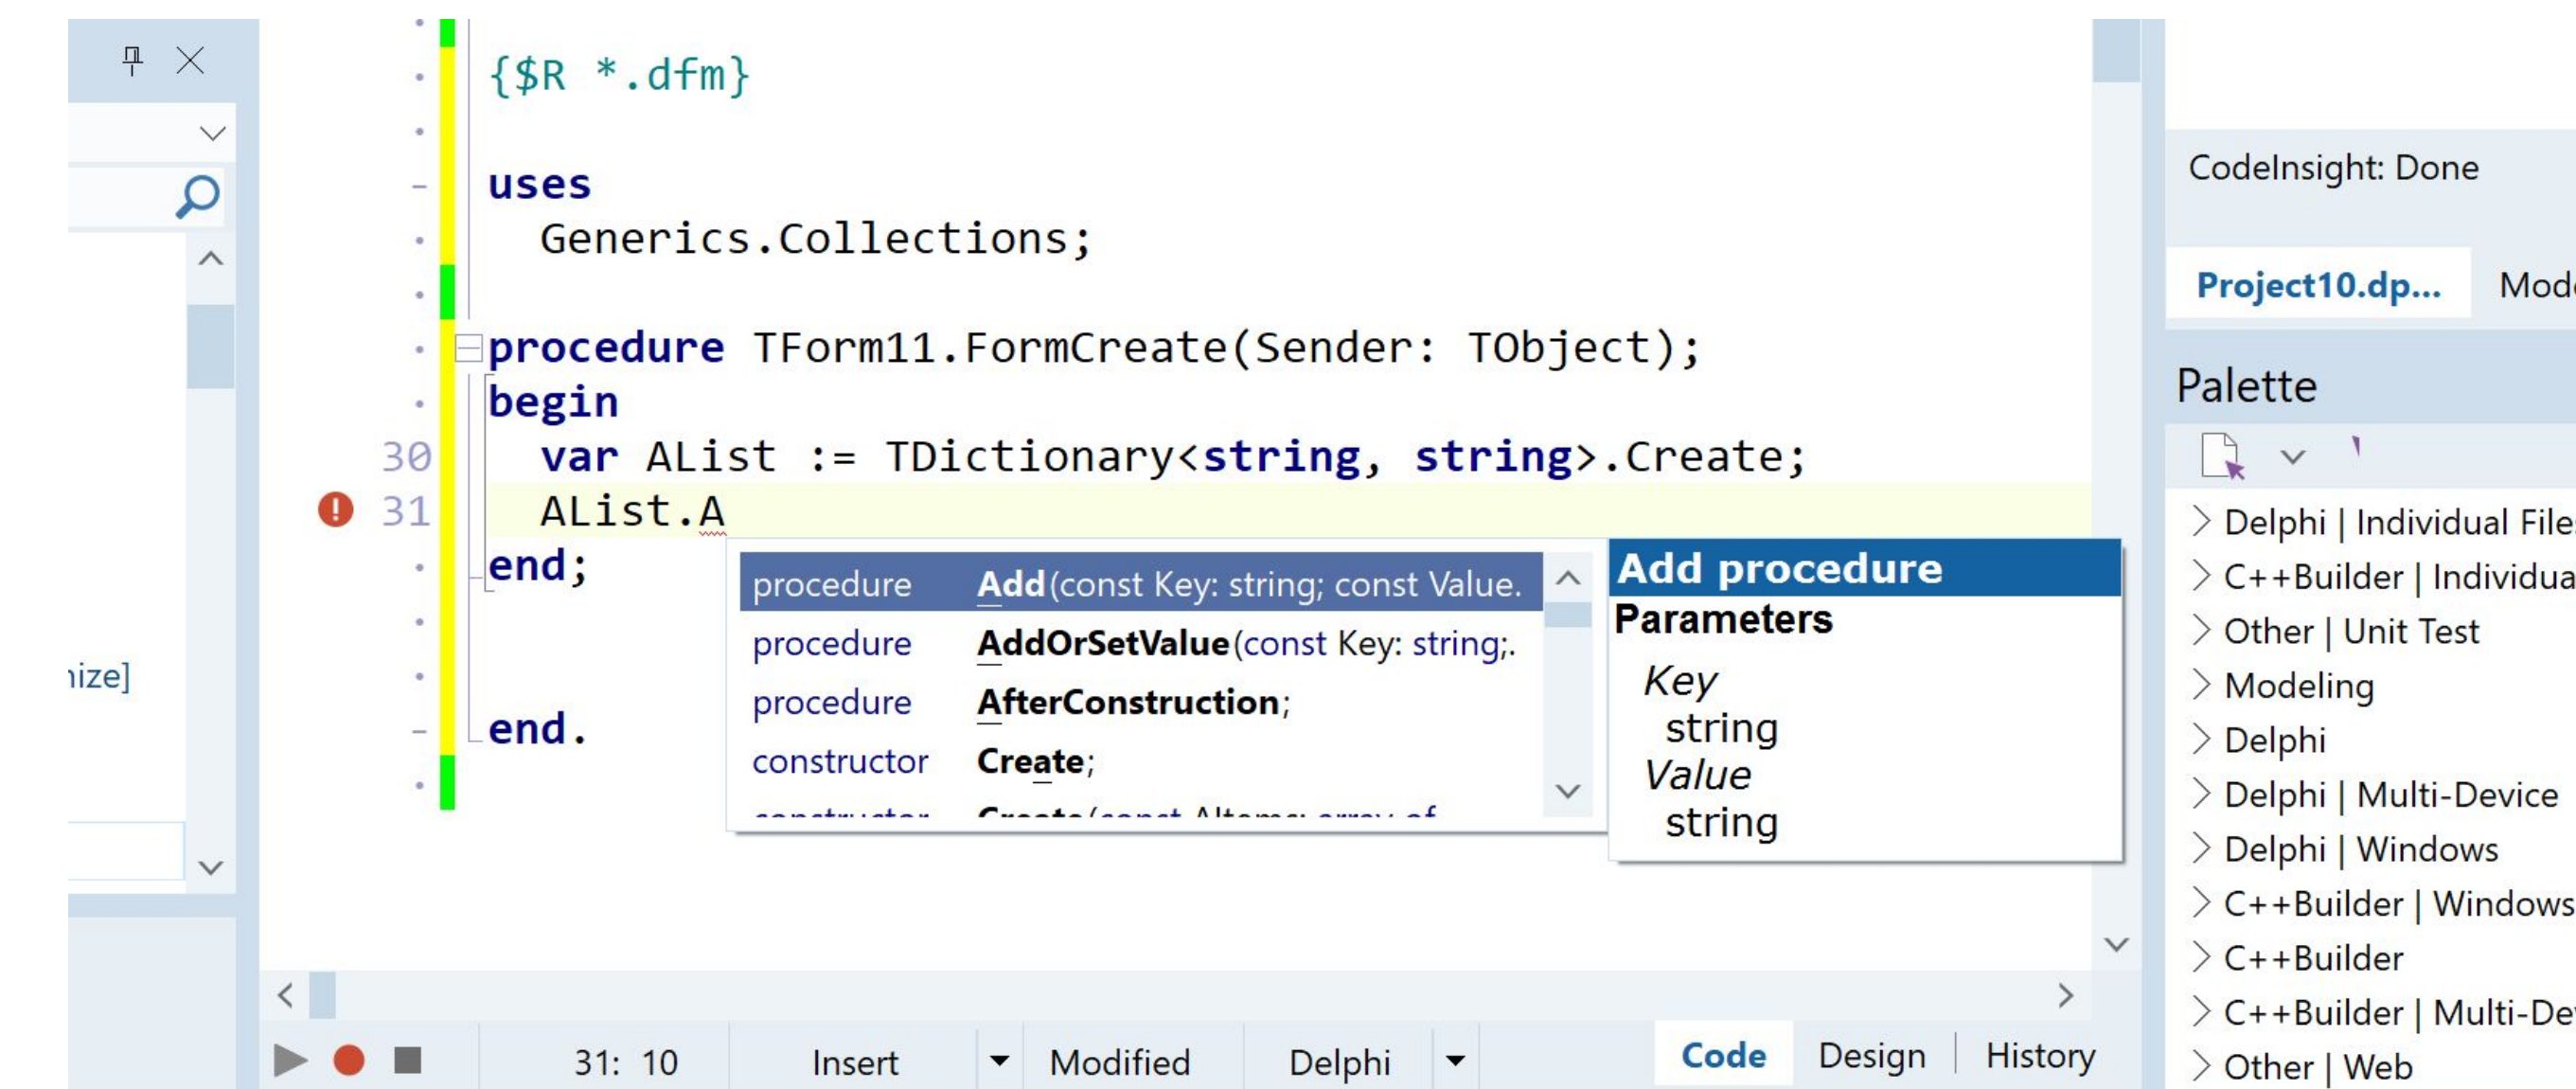

11.1: Welcome Page Updates

- Background wallpapers
 - Predefined for each of the 3 styles, you can use a custom image
- Supports adding custom frames with ToolsAPI
 - Demos on github.com/Embarcadero/RADStudio11Demos in Object Pascal ➤ VCL ➤ VCL WelcomePage

11.1 Code Insight Across Delphi and C++Builder

- Delphi LSP quality work
 - Big performance improvements, in common scenarios operations are **5-30x faster**
 - Biggest changes for units with lots of dependences
 - Improvements: type parameters when completing a class declaration, including T in a generic declaration, and showing set types
- Extensive C++ cquery quality work
 - Significant improvement to the features and performance (eg 30s down to 2 seconds)
 - *Planning a special C++ only followup release soon with even more improvements*

II. C++ and Delphi Compilers and Tools

11.0 Compilers

- New Delphi macOS 64-bit ARM target platform
 - Universal binary (package Intel + ARM)
- Minor Delphi language enhancements
 - Binary literals and digit separator support
 - Inline assembler support for AVX instructions (AVX-512)
- C++ Compilers
 - Improved RTTI (for components)
 - Further work on exception handling
 - CMake: revision of functionality and packages it can handle
 - C++/Delphi interop improvements

```

10 begin
    try
        var I : Integer := 1_000_000; // Thousands Separator
        Writeln(I);
        I := %1001001; // Binary Literal
        Writeln(I);
16     Readln;
    except
        on E: Exception do
            Writeln(E.ClassName, ': ', E.Message);
20 end;
end.

```

11.1 Compilers and Debuggers

- Delphi compilers improve stability and performance (when used by LSP engine)
- The Delphi and C++Builder Window compilers have additional support for ASLR, DEP/NX, and TSAWARE platform security settings, now enabled by default
- New Delphi Debuggers based on LLDB
 - Delphi macOS 64-bit ARM debugger
 - Delphi Android 64-bit debugger
 - *Part of strategic direction for RAD Studio debuggers to LLDB*
- C++ compiler, STL and RTL quality
 - Further improved Delphi RTL integration
 - For example, dynamic array with STL iterators

New Linker Options

- **Data Execution Prevention (DEP)**

- Allows the system to mark one or more pages of memory as non-executable preventing code from running from these regions of memory, making it harder to exploit *buffer overruns*.

- **Address Space Layout Randomization (ASLR)**

- Randomly arranges the address space positions of key data areas of a process, including the base of the executable and the positions of the stack, heap and libraries.
- Prevents exploitation of memory corruption vulnerabilities.

- **High-entropy 64-bit ASLR** (*Only in 64-bit applications*)

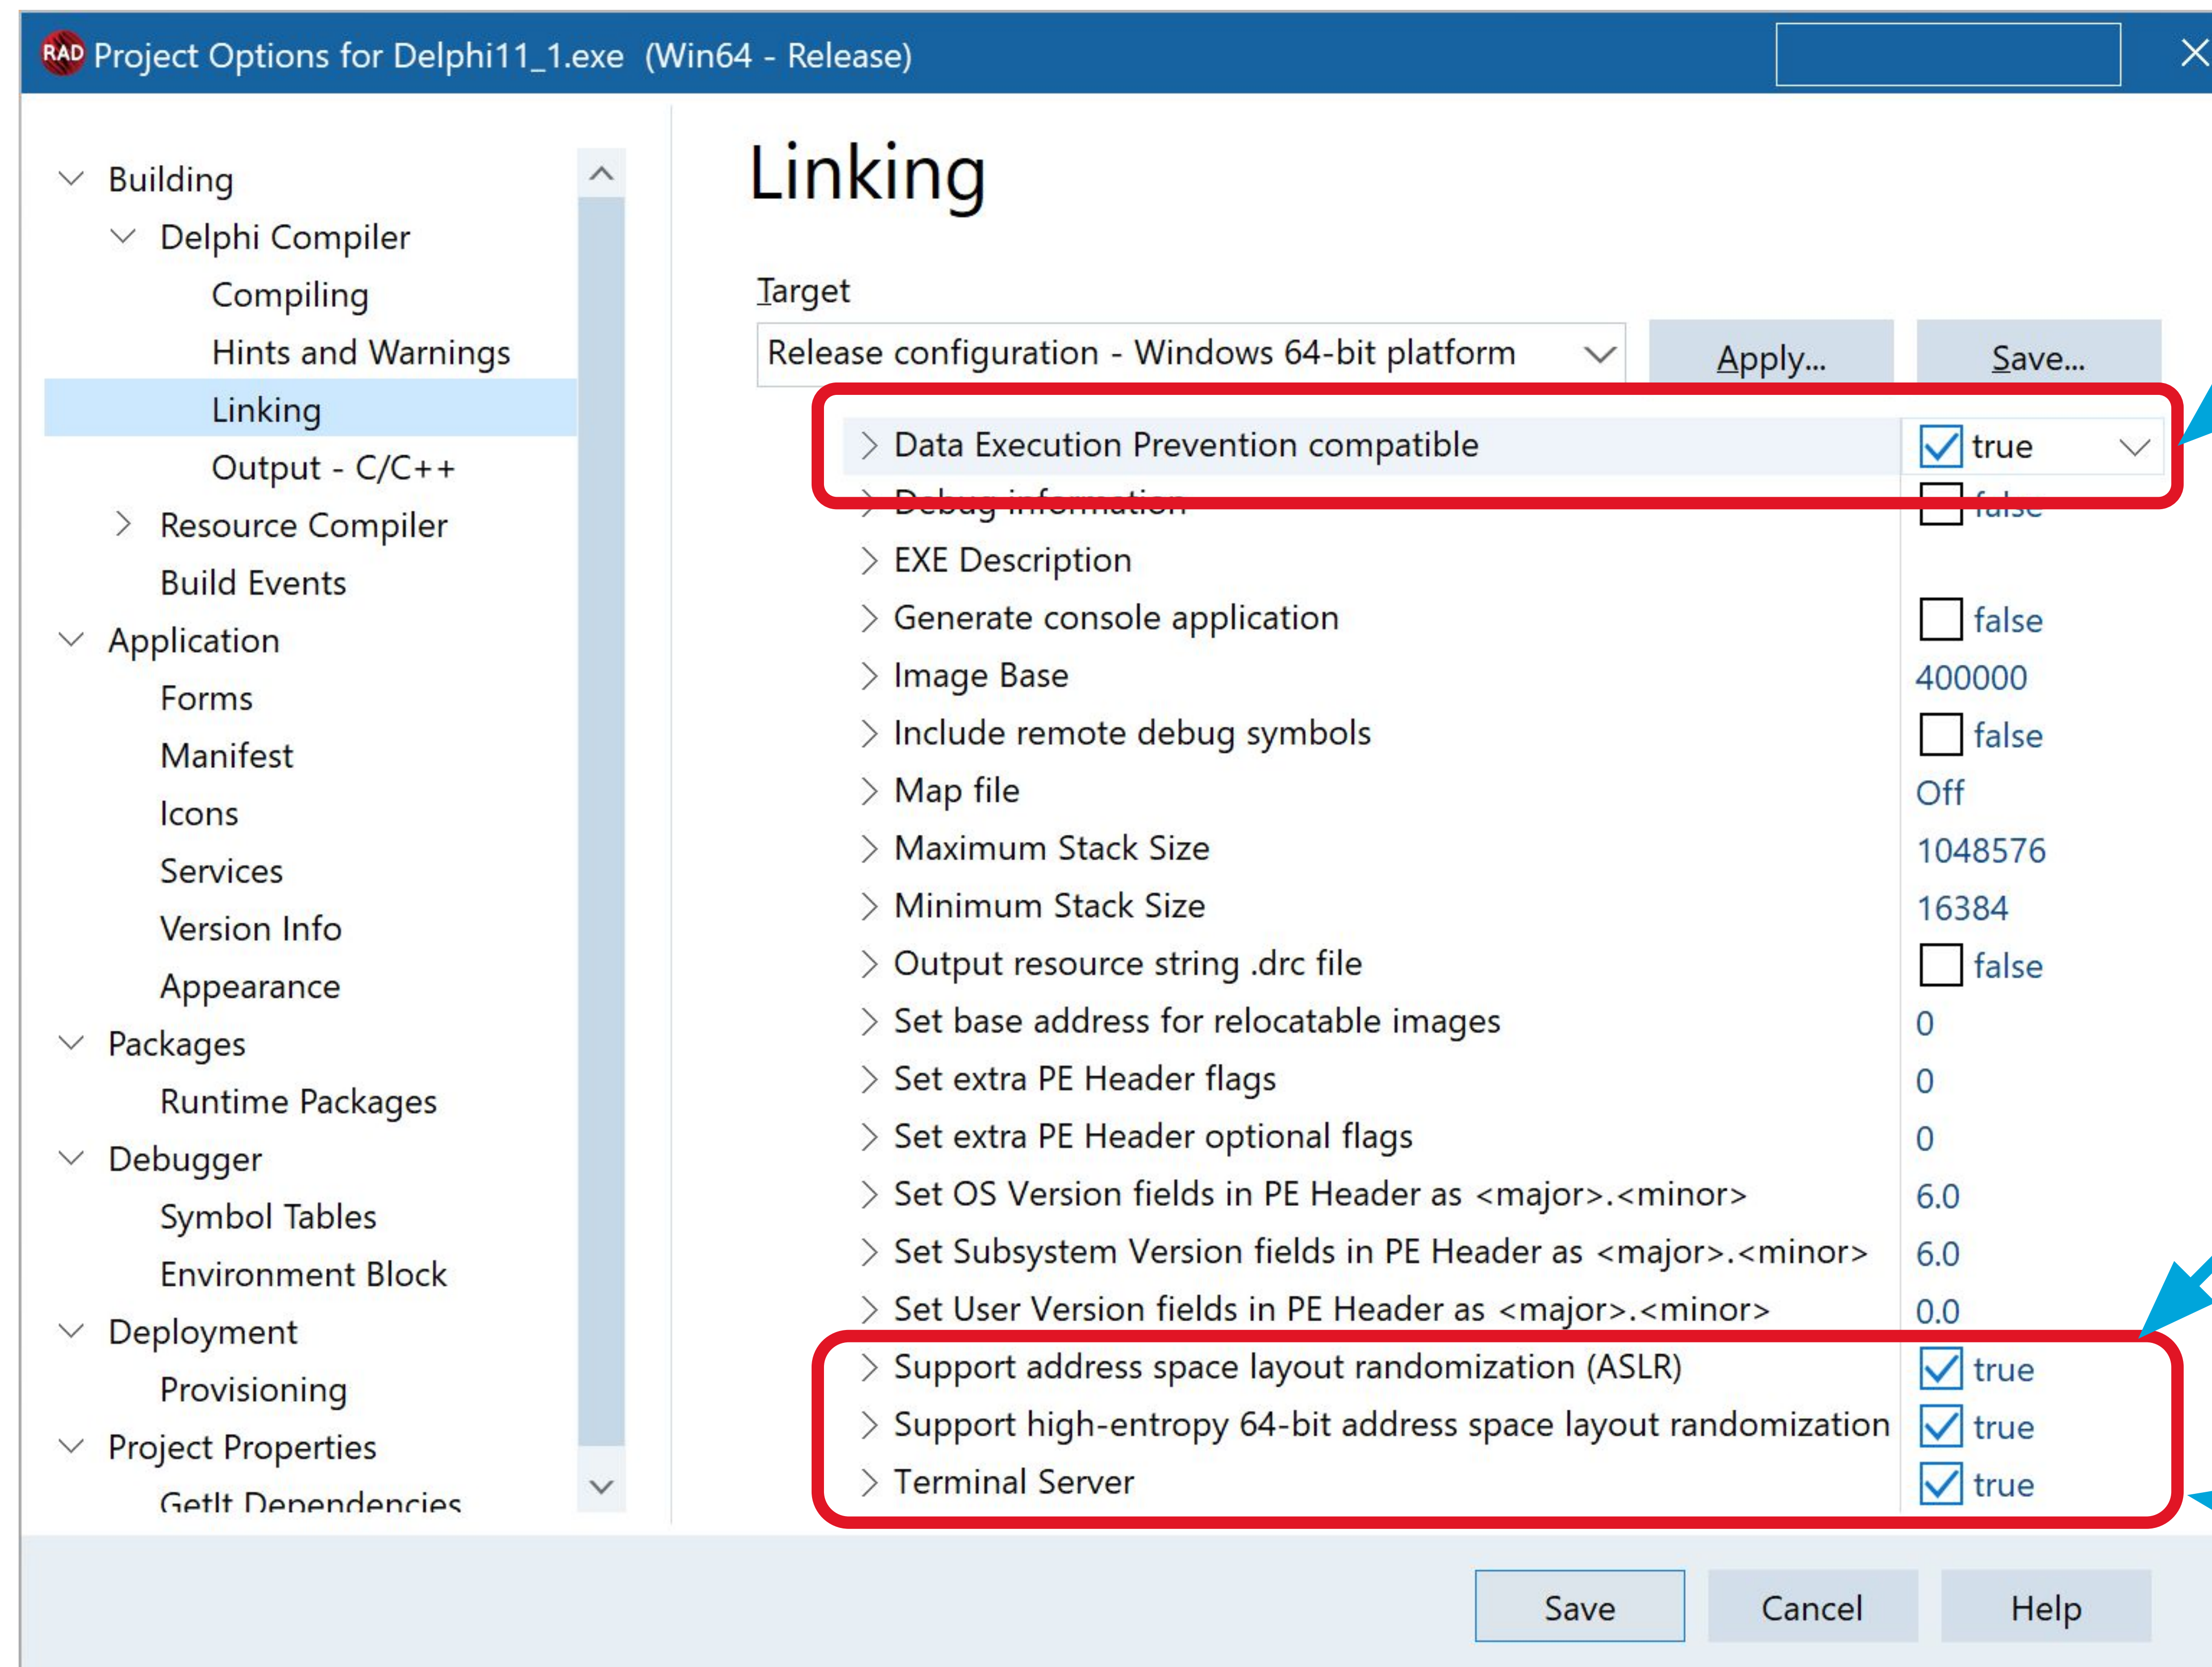

- Allows ASLR to use the entire 64-bit address space.

- **Terminal Services**

- Create Terminal Server aware (TSAWARE) applications.

New 11.1 Delphi Compiler Linking Options

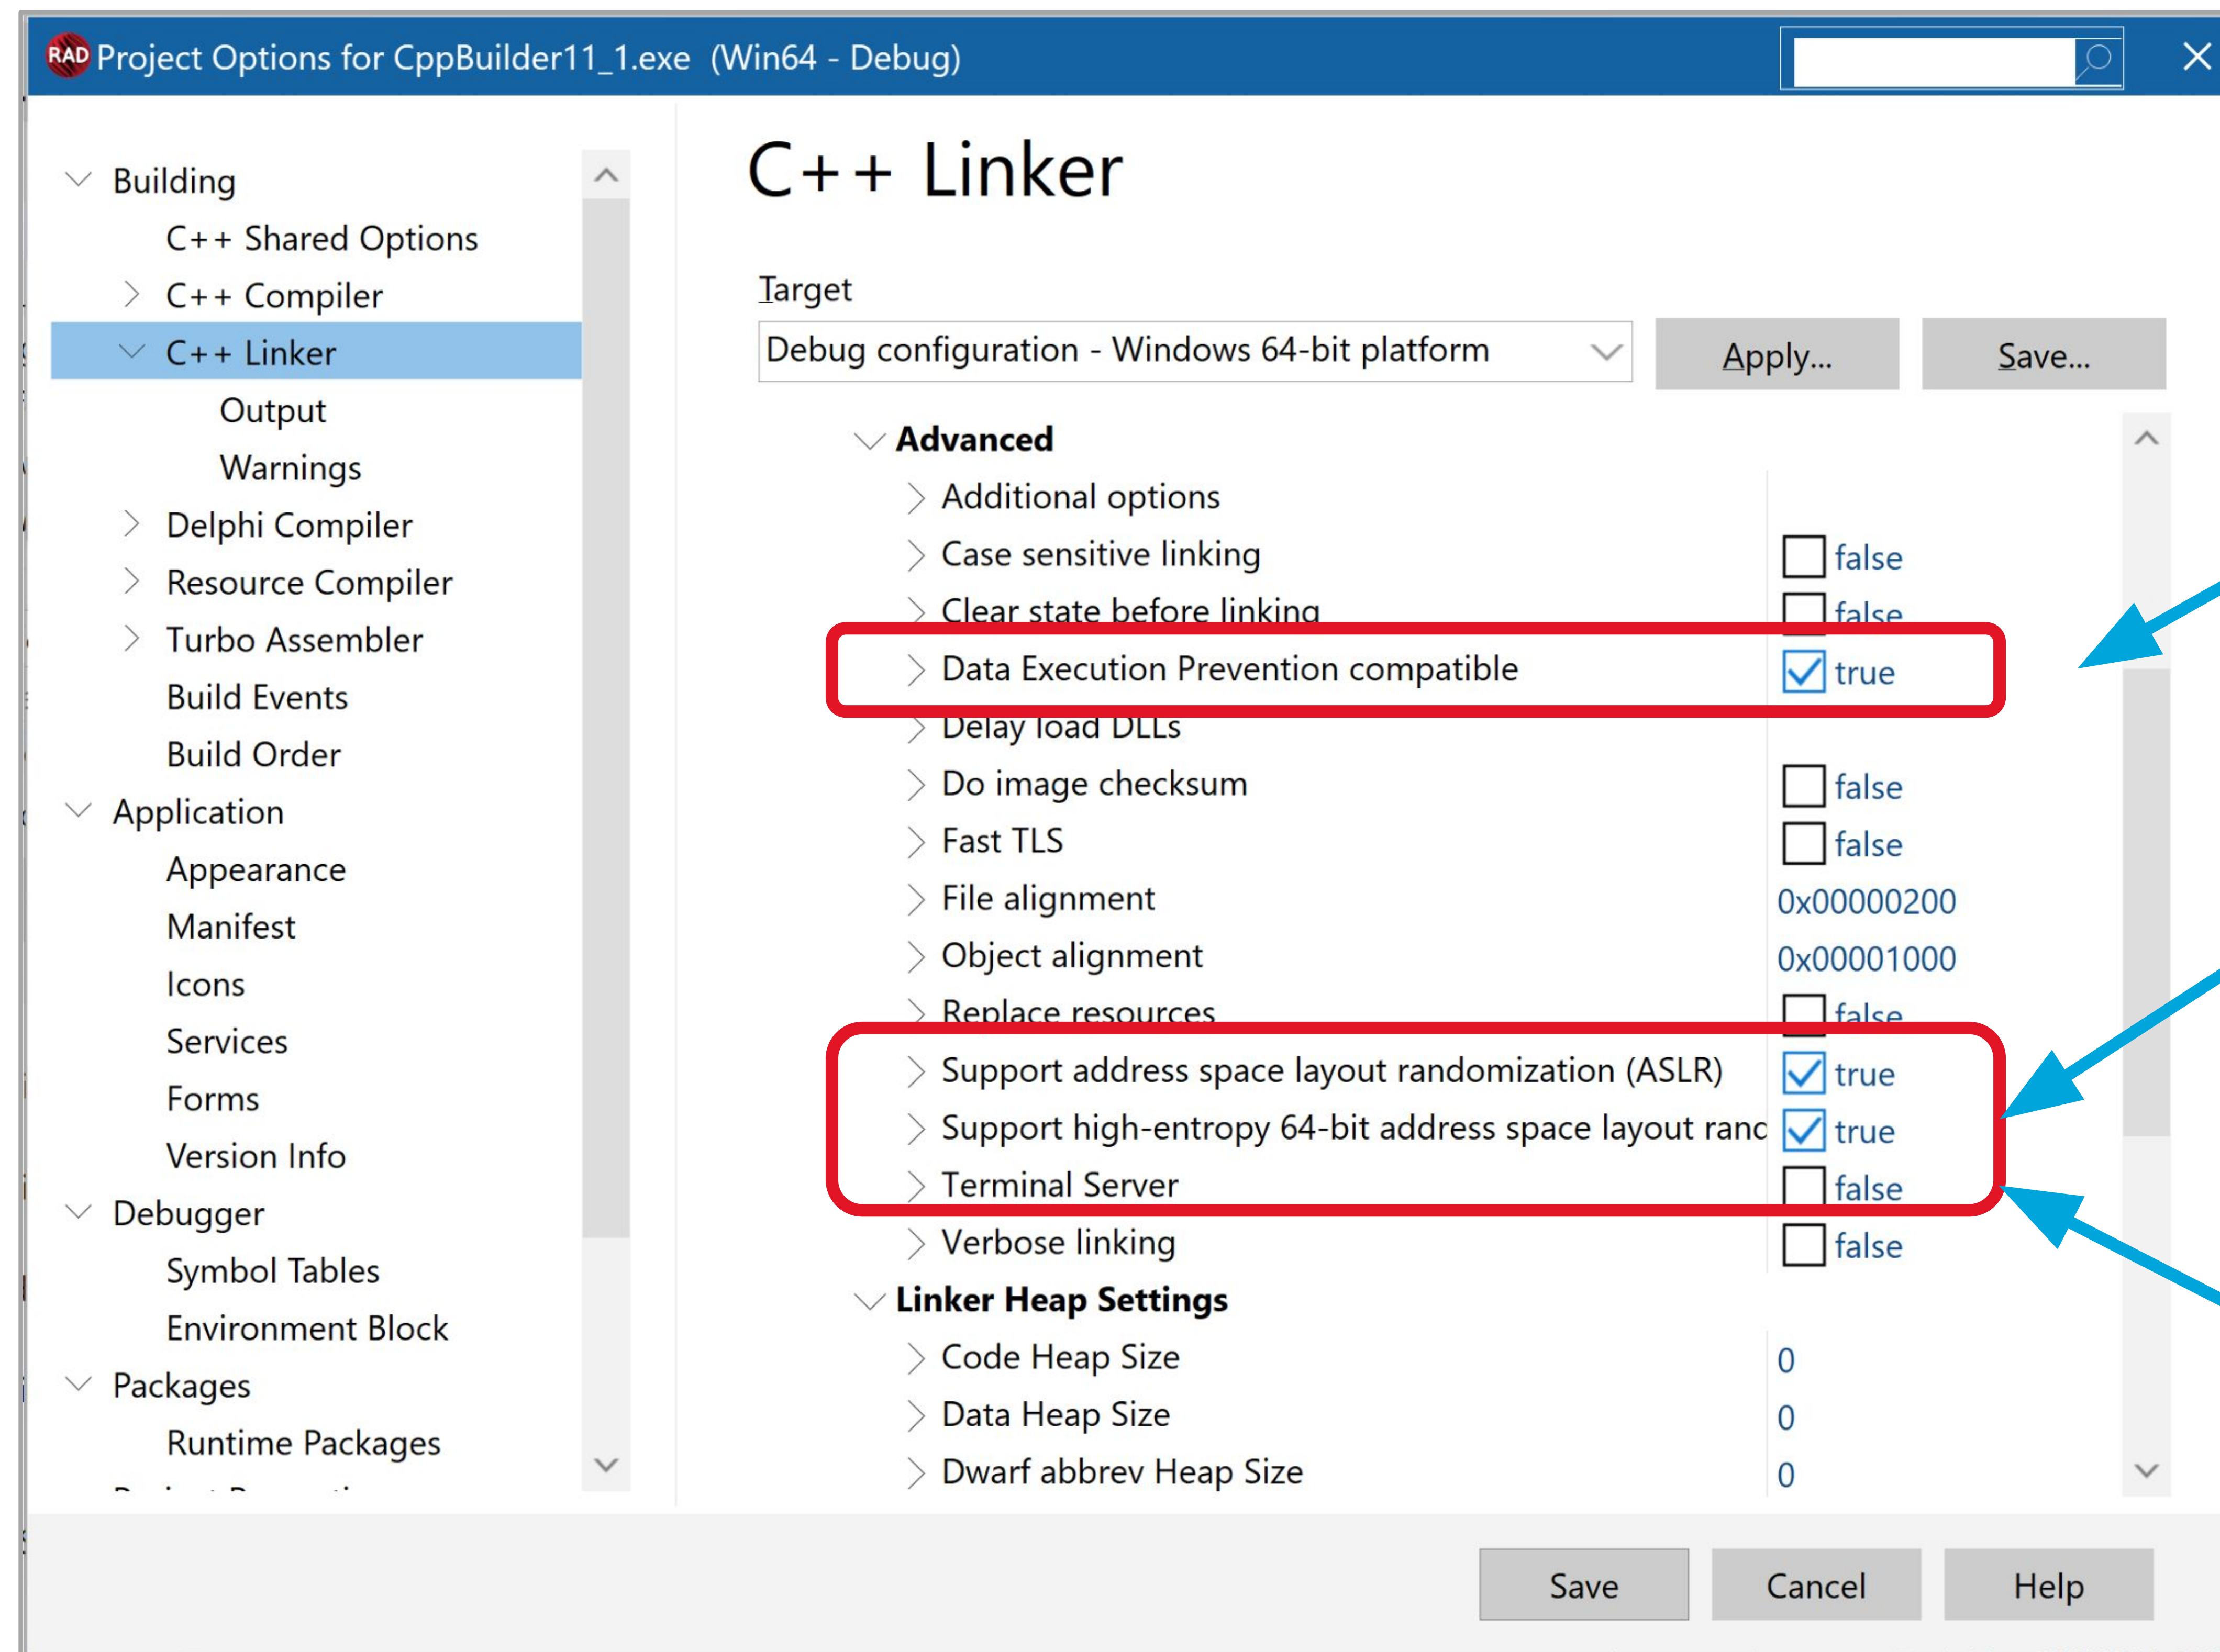

• Data Execution Prevention (DEP)

• Address Space Layout Randomization (ASLR)

• High-entropy 64-bit ASLR

• Terminal Server

New 11.1 C++Builder Linker Options

• Data Execution Prevention (DEP)

• Address Space Layout Randomization (ASLR)

• High-entropy 64-bit ASLR

• Terminal Server

III. RAD 11.1 Libraries Quality & Improvements

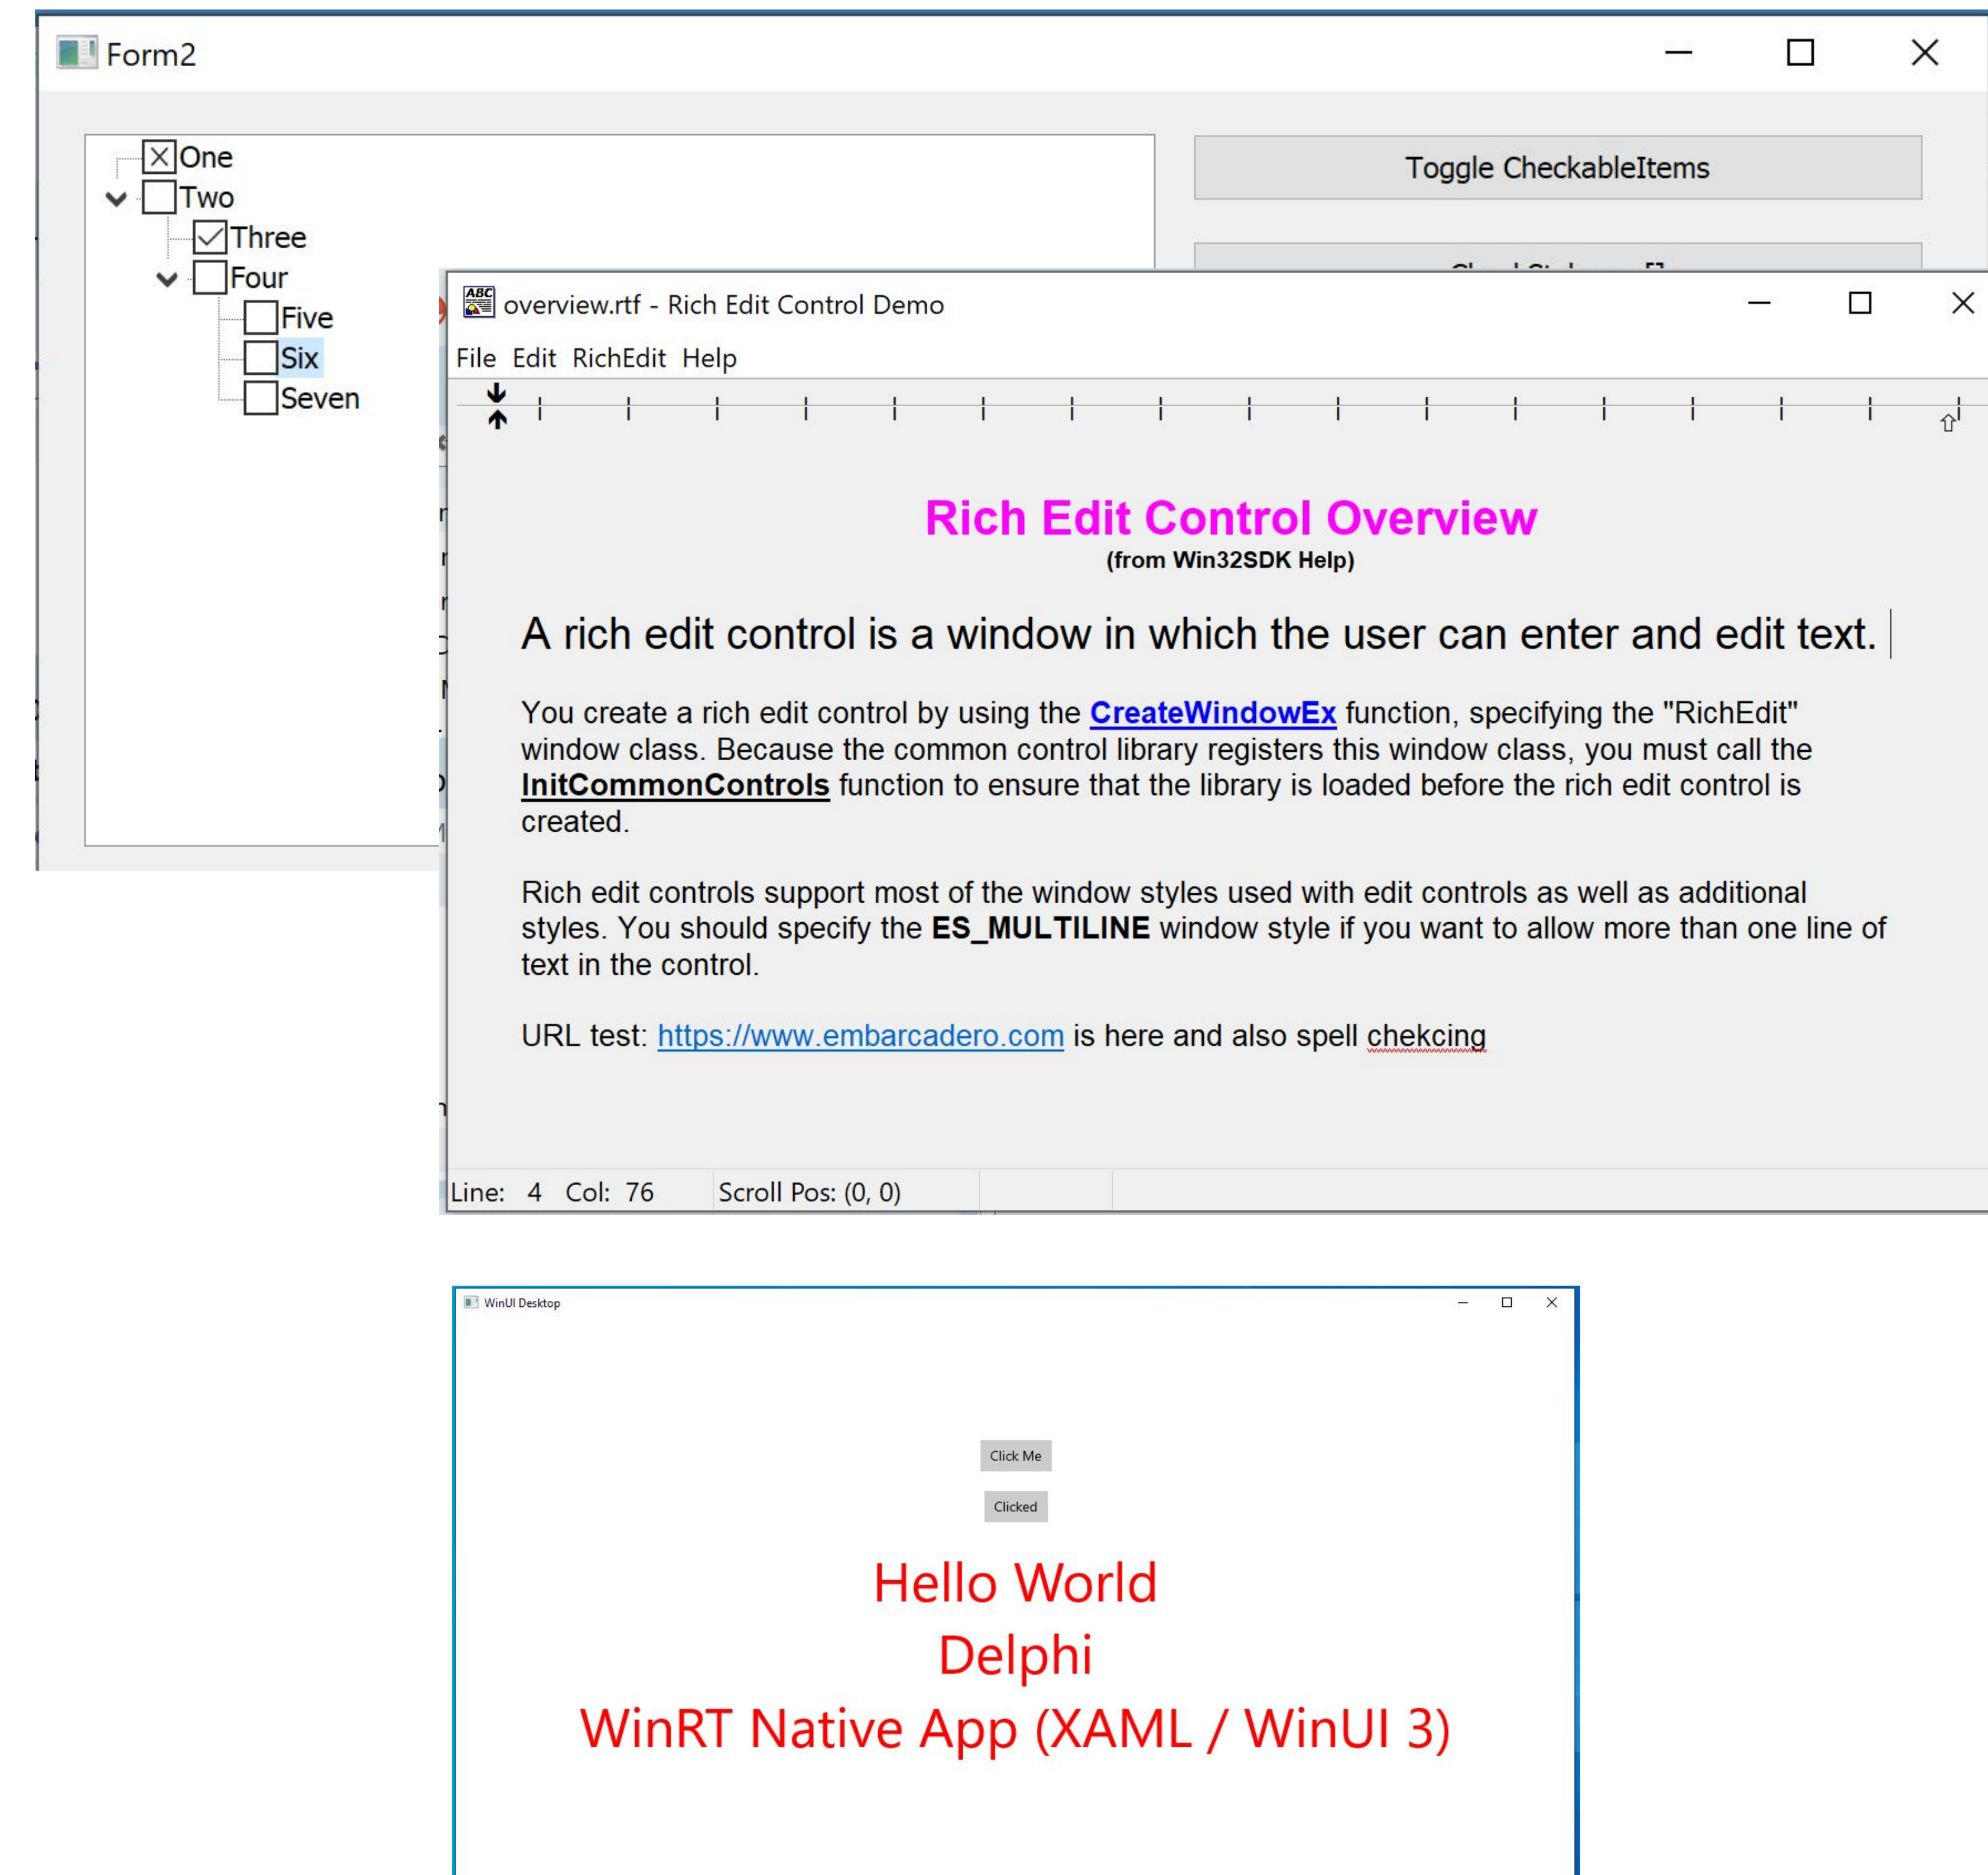

“Alexandria” VCL Improvements

● 11.0: Modernization Work

- “New” RichEdit implementation (RichEdit 4.1)
- Large collection of small improvements focused on removing XP legacies
- New TDBLabeledEdit component

● 11.1 VCL focus on recent features

- Including enhanced TTreeView, TRichEdit, TEdgeBrowser, TLabelledEdit and TNumberBox, flickering and DoubleBuffering, VCL High-DPI and scaling issues
- A Delphi WinUI3 demo (available in GetIt)
 - Part of our Windows App SDK focus

FireMonkey in “Alexandria”

11.0 Desktop and Mobile Improvements

- Better FMX Windows and desktop integration
- FireMonkey Windows High-DPI improvements
 - From pixels to device independent units (PX to DP)
- Target Android API 30 (AndroidX, in-app purchases, matching new Play Store requirements)
- WebView 2 (Chromium Edge) implementation of **TWebBrowser**

11.1 Quality Work

- **TListView** and **TWebBrowser** quality
- Improved Android SDK integration
- Windows High DPI-related issues
- Performance and much more

Delphi RTL in “Alexandria”

• 11.0 Key Features

- TZipFile (including Zip64, files deletion, quality improvements and optimizations)
- Large data structures (and 64-bit) improvements
 - Lists, large stream operations, dictionary improvements for hashing and capacity
- Record helpers for TDateTime and TCurrency, UTCNow function
- New core classes: TNoRefCountObject and TPointerStream
- Bluetooth LE quality (for most platforms)
- Performance optimizations and RTTI improvements (open array support)
- PPL Thread pool statistics

• 11.1 Delphi RTL optimization and quality work

- New TURLStream class (a TStream descendant with support for async operations)
- Support for Window 11 and Server 2022 in the TOSVersion data structure

11.1 Data and Internet Improvements

- Data RTL and FireDAC Improvements
 - FireDAC Structure View integration
 - Support for MariaDB 10.6, SQLite Encryption Extension (SEE), Firebird 4 new data types
- RAD Server
 - New REST SysAdmin endpoints for logs handling, backups management, and database validation
 - Integrated deployment feature for RSLite
 - RAD Server Lite (introduced in 11.0): Embeds IBToGo, easy to deploy, unlimited deployment, limited throughput*
- Web Technologies
 - WebBroker on Android
 - DataSnap quality

11.1 Quality Portal and Overall Quality

- Specific fixes for over 650 QP issues

- New Features: 30

- Bugs: 632*

** Estimate, pending final testing on a few issues, doesn't include duplicates and won't fix/works as expected items*

- QP issues addressed by product area:

- IDE: over 250 issues

- FireMonkey and VCL: around 100 issues each

- RTL, Data, Compilers: over 50 issues for each area

Additional Product Initiatives

- Appercept's AWS SDK for Delphi
 - Long term distribution deal, included in Enterprise and Architect
 - New releases expected at a constant pace
- Delphi UI libraries (VCL + FMX) for Python
 - Free UI library for Python developers
 - Upgrade to a Delphi license for additional power and features
 - Also, you can use Python in Delphi applications

RAD Studio 11.1 Summary

I. Focus on Quality and Improvements

- Usability, performance, stability
- Extensive High DPI IDE quality (and Remote Desktop)
- Improved High DPI designers for VCL and FireMonkey and the styled VCL form designer
- Welcome Page now offers background images and supports adding custom frames
- GetIt dialog with cached images and a reworked UI
- Small new IDE features

II. Better Code Insight and LSP

- Significant C++ cquery LSP engine work
- Delphi LSP performance focus and quality

III. Platforms and Tooling

- Official support for Windows 11, macOS 12 Monterey , iOS 15, and Android 12 
- Delphi macOS 64-bit ARM debugger and Android 64-bit debugger based on LLDB
- C++ STL and RTL improve

IV. Libraries

- Performance and quality improvements and small additions to Delphi RTL, database libraries, VCL, FireMonkey
- Some new small features
